RESEARCH OBJECTIVES

PRIMARY RESEARCH OBJECTIVE:
To measure and understand citizen perception of services offered and operated by the City of De Pere.

MORE SPECIFICALLY, THE 2022 STUDY WILL:
- Determine the level importance regarding city services
- Assess overall satisfaction with City of De Pere
- Identify potential changes to city services including but no limited to parking, compost, and pools
- Assess options on future De Pere issues including DEI, policing, and city services
Methodology

Online Survey

An online survey of City of De Pere adults.

- Online survey dates were from February 11, 2022 to February 21, 2022.
- 999 City of De Pere residents aged 18 or older completed the online survey.

The analyses are weighted to reflect the age and gender demographic profile of the City of De Pere.

All questions were cross tabulated with the various demographic groups; only differences at the .05 level are reported. Group differences at the .05 level suggests that we can be 95% sure that the association between two values did not occur by chance only.

Survey recruitment included postcards mailed to every De Pere residence, social media posts, and news articles.
Methodology

Online Survey Quality
Respondents were recruited from multiple sources and vetted for quality. Criteria for exclusion include:

- Illogical or inconsistent response patterns
- High frequency of non-response
- Rapid survey completion
- Multiple responses from a single address that without variation in survey responses
INTERPRETING THE RESULTS

USING THE MARGIN OF ERROR:

▪ Every random sample study has a Margin of Error associated with the study since a sample was taken rather than using the entire population. This is an online sample, and we are adopting the conventional approach to Margin of Error.

▪ The Margin of Error for this study is assumed to be +/- 3% at the 95% Confidence Interval.

▪ If the Margin of Error is +/- 3% and the percent in the sample who rate the City of De Pere as an Excellent place to live is 51%, you would subtract 3% from 51% and add 3% to 51% to create the 95% Confidence Interval (CI). In this case, the 95% CI would be 48% to 54%.

▪ We would be 95% certain that if all community members had completed the survey, the true population proportion that rate the City of De Pere as Excellent would fall between 48% to 54%.

Percentages in some tables and graphs may not total 100% due to rounding.
