De Pere feedback survey results available for review

DE PERE, WIS. – In an effort to identify areas where the City of De Pere is doing well and where there is room to improve, the City recently conducted a community-wide survey to gain feedback regarding the performance of its municipal services.

The City of De Pere partnered with the St. Norbert College Strategic Research Institute for this 2022 De Pere City Services Study. Nearly 1,000 individuals responded to the survey.

City of De Pere staff and elected officials received the summarized results of the survey yesterday and will review and evaluate the data in an effort to help continually improve, enhance or introduce better service throughout De Pere.

The community – including residents, businesses, and City partners - are also welcome to review results of the survey. To do so, visit www.deperewi.gov and look for the “Survey Results” icon.
