

How to Add “Facilities” to Your Garner Account

garner™

Keep all your important healthcare locations—like labs, imaging centers, and urgent care centers—in one place by searching for them, which will add them to your Approved Providers list. **Follow the steps below to make sure they’re linked and eligible for reimbursement.**

Automatic Qualification

Your lab/imaging costs will automatically qualify for Garner reimbursement if:

- 1 The Top Provider who ordered the labs or imaging was on your approved provider list before the date of service.
- 2 The facility is in-network and the services are covered by your health insurance plan.

If the above two conditions are met, you automatically qualify for reimbursement. **No need to search in the app—you’re covered.**

Manual Qualification

You can save money by completing your labs, non invasive imaging, and urgent care visits at free standing facilities linked to your Garner account.

- 1 Use the Garner app or website to search for labs, imaging centers, or urgent care facilities with these services before your appointment.
- 2 Look for a yellow banner that says “eligible with some exceptions.”
- 3 Confirm the facility is in-network and the services are covered by your insurance plan.

Important Reminder:

While we strive to ensure recommended facilities are in-network with your health insurance plan, this information is subject to change. We recommend confirming with the facility **before your appointment**. Garner does not recommend specific hospitals or facilities beyond those that fulfill the qualifications above. If seeking care at another facility, **ensure the provider is a Top Provider in the Garner Health app or website before your appointment to qualify for your reimbursement.**
