**APRIL 7, 2023 – APRIL 14, 2023**

**CITY OF DE PERE**

**ADVERTISEMENT TO BID**

**PROJECT 23-01**

**SEWER AND WATER RELAY AND STREET RESURFACING**

Online bids will be received and accepted for Project 23-01 Sewer and Water Relay and Street Resurfacing via the online electronic bidding service through QuestCDN.com, until 1:00 PM, Wednesday, April 26, 2023, at which time they will be publicly accepted, displayed and read aloud.

Project 23-01 for which proposals are being sought includes the following approximate quantities:

- 1,700 LF relay sanitary laterals (4-inch and 6-inch) and associated appurtenances.
- 3,900 LF new and relay storm sewer (8-inch to 15-inch) and associated appurtenances.
- 1,900 LF relay water main (8-inch) and associated appurtenances.
- 2,100 TONS asphaltic concrete pavement placement.
- 3,800 SY asphaltic concrete pavement milling and/or pulverizing.
- 3,600 LF replace concrete curb and gutter.
- 1,250 SY replace concrete sidewalks, driveways and pedestrian ramps (4-inch to 8-inch).

Complete digital project bidding documents are available for viewing and/or downloading at [www.QuestCDN.com](http://www.QuestCDN.com) or may be examined at the office of the Director of Public Works. Digital plan documents may be downloaded for \$15 by inputting Quest project #8350097 on Quest's Project Search page. Project documents must be downloaded from QuestCDN which will add your company to the Planholder List and allow access to vBid online bidding for the submittal of your bid. Bidders will be charged an additional fee of \$30 to submit a bid electronically. The QuestCDN website can also be accessed through the City website at [www.deperewi.gov/projects](http://www.deperewi.gov/projects) or by pressing the *Projects* icon at the bottom of any City website page. Contact QuestCDN Customer Support at 952-233-1632 or [info@questcdn.com](mailto:info@questcdn.com) for assistance in membership registration, downloading digital project information and vBid online bid submittal questions.

Each proposal shall be accompanied by a bid bond in an amount equal to five percent (5%) of the bid, payable to the City of De Pere, as a guarantee that if the bid is accepted, the bidder will execute a contract and furnish a contract bond as set forth in the General Conditions of the City of De Pere. In case the bidder fails to file such contract and bond, the amount of the bid bond shall be forfeited to the City of De Pere as liquidated damages.

**Project 23-01  
Sewer and Water Relay and Street Resurfacing**

**City of De Pere**

The letting of the contract is subject to the provisions of the following Wisconsin Statutes:

Section 62.15 regarding Public Works.

Section 66.0901(3) regarding Prequalification of Contractor.

Each bidder shall pre-qualify by submitting proof of responsibility on forms furnished by the Director of Public Works. Such forms shall be filed with the Director of Public Works no later than 4:00 PM, Monday, April 24, 2023. Prospective bidders who have previously submitted such forms subsequent to January 1, 2023 will not be required to separately submit such form for this project.

The City of De Pere reserves the right to reject any or all bids, to waive any informalities in bidding and to accept any proposal which the Common Council deems most favorable to the interest of the City of De Pere.

Dated this 7<sup>th</sup> day of April 2023.

Board of Public Works  
City of De Pere  
Eric Rakers, P.E.  
City Engineer

Project 23-01

**SECTION 00 21 13**

**INSTRUCTIONS TO BIDDERS**

**ARTICLE 1 – DEFINED TERMS**

- 1.1 Terms used in these Instructions to Bidders have the meanings indicated in the General Conditions. Additional terms used in these Instructions to Bidders have the meanings indicated below:

None

**ARTICLE 2 – COPIES OF BIDDING DOCUMENTS**

- 2.1 Complete sets of the Bidding documents in the number and for the deposit sum, if any, stated in the Advertisement to Bid may be obtained as stated in the Advertisement for bids.
- 2.2 Complete sets of Bidding Documents shall be used in preparing Bids; Owner does not assume any responsibility for errors or misinterpretations resulting from the use of incomplete sets of Bidding Documents.
- 2.3 Owner, in providing the Bidding Documents on the terms stated in the Advertisement for Bids, does so only for the purpose of obtaining Bids for the Work and does not confer a license or grant for any other use.

**ARTICLE 3 – QUALIFICATIONS OF BIDDERS**

- 3.1 In accordance with Section 66.0901(3), each bidder shall pre-qualify by submitting proof of responsibility on forms furnished by the Director of Public Works. Such forms shall be filed with the Director of Public Works as stated in the Advertisement for Bids. Prospective bidders who have previously submitted such forms after January 1<sup>st</sup> of this year will not be required to separately submit such form for this project.

**ARTICLE 4 – EXAMINATION OF BIDDING DOCUMENTS, OTHER RELATED DATA AND SITE**

- 4.1 Provisions concerning responsibilities for the adequacy of data furnished to prospective Bidders with Underground Facilities, and possible changes in the Bidding Documents due to differing or unanticipated conditions appear in the General Conditions.
- 4.2 Underground Facilities
- A. Information and data shown or indicated in the Bidding Documents with respect to existing Underground Facilities at or contiguous to the Site is based upon information and data furnished to Owner and Engineer by owners of such Underground Facilities, including Owner, or others.

**4.3 Subsurface and Physical Conditions**

**A. The technical data includes:**

1. Those reports known to Owner of explorations and tests of subsurface conditions at or contiguous to the Site; and
2. Those drawings known to Owner of physical conditions relating to existing surface or subsurface structures at the Site (except underground Facilities).
3. No reports of explorations or tests of subsurface conditions at or contiguous to the Site, or drawings of physical conditions relating to existing surface or subsurface structures at the Site, are known to Owner.

**B. Limited Reliance by Contractor on Technical Data Authorized: Contractor may rely upon the accuracy of the “technical data” contained in such reports and drawings, but such reports and drawings are not Contract Documents. Contractor may not rely upon or make any claim against Owner, or any of their officers, directors, members, partners, employees, agents, consultants, or subcontractors with respect to:**

1. the completeness of such reports and drawings for Contractor’s purposes, including but not limited to, any aspects of the means, methods, techniques, sequences, and procedures of construction to be employed by Contractor, and safety precautions and programs incident thereto; or
2. Other data, interpretations, opinions, and information contained in such reports or shown or indicated in such drawings; or
3. Any Contractor interpretation of or conclusion drawn from any “technical data” or any such other data, interpretations, opinions, or information.

**4.4** On request, Owner will provide Bidder access to the Site to conduct such examinations, investigations, explorations, tests, and studies as Bidder deems necessary for submission of a Bid. Bidder shall fill all holes and clean up and restore the Site to its former condition upon completion of such explorations, investigations, tests, and studies. Bidder shall comply with all applicable Laws and Regulations relative to excavation and utility locates.

**4.5** Reference is made to Section 01 10 00: Summary of Work, for work that will be completed and for the identification of the general nature of other work that is to be performed at the Site by Owner or others (such as utilities and other prime contractors) that relates to the Work contemplated by these Bidding Documents. On request, Owner will provide to each Bidder for examination access to or copies of Contract Documents (other portions thereof related to price) for such other work.

**4.6** It is the responsibility of each Bidder before submitting a Bid to:

- A. Examine and carefully study the Bidding Documents, the other related data identified in the Bidding Documents, and any Addenda;**
- B. Visit the Site and become familiar with and satisfy Bidder as to the general, local, and Site conditions that may affect cost, progress, and performance of the Work;**

- C. Become familiar with and satisfy Bidder as to all federal, state, and local Laws and Regulations that may affect cost, progress, and performance of the Work;
  - D. Obtain and carefully study (or accept consequences of not doing so) all examinations, investigations, explorations, tests, studies, and data concerning conditions (surface, subsurface, and Underground Facilities) at or contiguous to the Site which may affect cost, progress, or performance of the Work or which relate to any aspect of the means, methods, techniques, sequences, and procedures of construction to be employed by Bidder, including applying any specific means, methods, techniques, sequences, and procedures of construction expressly required by the Bidding Documents, and safety precautions and programs incident thereto;
  - E. Agree at the time of submitting its Bid that no further examinations, investigations, explorations, tests, studies, or data are necessary for the determination of its Bid for performance of the Work at the price(s) bid and within the times and in accordance with the other terms and conditions of the Bidding Documents;
  - F. Become aware of the general nature of the work to be performed by Owner and others at the Site that relates to the Work as indicated in the Bidding Documents;
  - G. Correlate the information known to Bidder, information and observations obtained from visits to the Site, reports and drawings identified in the Bidding Documents, and all additional examinations, investigations, explorations, tests, studies, and data with the Bidding Documents;
  - H. Promptly give Engineer written notice of all conflicts, errors, ambiguities, or discrepancies, that bidder discovers in the Bidding Documents and confirm that the written resolution thereof by Engineer is acceptable to Bidder; and
  - I. Determine that the Bidding Documents are generally sufficient to indicate and convey understanding of all terms and conditions for the performance of the Work.
- 4.7 The submission of a Bid will constitute an incontrovertible representation by Bidder that Bidder has complied with every requirement of this Article 4, that without exception the Bid is premised upon performing and furnishing the Work required by the Bidding Documents and applying any specific means, methods, techniques, sequences, and, procedures of construction that may be shown or indicated or expressly required by the Bidding Documents, that Bidder has given Engineer written notice of all conflicts, errors, ambiguities, and discrepancies that Bidder has discovered in the Bidding Documents and the written resolutions thereof by Engineer are acceptable to Bidder, and that the Bidding Documents are generally sufficient to indicate and convey understanding of all terms and conditions for performing and furnishing the Work.

#### ARTICLE 5 – SITE AND OTHER AREAS

- 5.1 The Site is identified in the Bidding Documents. Easements for permanent structures or permanent changes in existing facilities are to be obtained and paid for by Owner unless otherwise provided in

the Bidding Documents. All additional lands and access thereto required for temporary construction facilities, construction equipment, or storage of materials and equipment to be incorporated in the Work are to be obtained and paid for by Contractor.

**ARTICLE 6 – INTERPRETATIONS AND ADDENDA**

- 6.1 All questions about the meaning or intent of the Bidding Documents are to be submitted to Engineer in writing. Interpretations or clarifications considered necessary by Engineer in response to such questions will be issued by Addenda mailed or delivered to all parties recorded by Engineer as having received the Bidding Documents. Questions received less than ten days prior to the date for opening of Bids may not be answered. Only questions answered by Addenda will be binding. Oral and other interpretations or clarifications will be without legal effect.
- 6.2 Addenda may be issued to clarify, correct, or change the Bidding Documents as deemed advisable by Owner and Engineer.

**ARTICLE 7 – BID SECURITY**

- 7.1 A Bid shall be accompanied by Bid security made payable to Owner in an amount of five percent (5%) of Bidder's maximum Bid price and in the form of a certified check or bank money order or Bid bond (on the form attached) issued by a surety meeting the requirements of the General Conditions. Submittal of a Bid Bond on a form other than the Bid Bond form included in the Bidding Documents may be cause for rejection of Bid. The fully executed bid bond must be uploaded into QuestCDN. If the bidder elects to furnish bid security other than a bid bond, the bid security must be submitted in a sealed envelope enclosed in a separate package plainly marked on the outside with the notation "BID SECURITY" along with the project number and name and addressed to the Board of Public Works of the City of De Pere, Municipal Service Center, 925 S. Sixth Street, De Pere, WI 54115 **prior to the deadline for submission of bids.**
- 7.2 The Bid security of the Successful Bidder will be retained until such Bidder has executed the Contract documents, furnished the required contract security and met the other conditions of the Notice of Award, whereupon the Bid security will be returned. If the Successful Bidder fails to execute and deliver the Contract Documents and furnish the required contract security within fifteen (15) days after the Notice of Award, Owner may annul the Notice of Award and the Bid security of that Bidder will be forfeited. The Bid security of other Bidders whom Owner believes to have a reasonable chance of receiving the award may be retained by Owner per the General Conditions.
- 7.3 Bid security of other Bidders whom Owner believes do not have a reasonable chance of receiving the award will be returned within seven days after the Bid opening.

**ARTICLE 8 – CONTRACT TIMES**

- 8.1 The number of days within which, or the dates by which, Milestones are to be achieved and the

Work is to be substantially completed and ready for final payment are set forth in the Bid Form and Summary of Work.

**ARTICLE 9 – LIQUIDATED DAMAGES**

9.1 Provisions for liquidated damages are set forth in the General Conditions.

**ARTICLE 10 – SUBSTITUTE AND “OR-EQUAL” ITEMS**

10.1 The Contract, if awarded, will be based on materials and equipment specified or described in the Bidding Documents without consideration of possible substitute or “or-equal” items. Whenever it is specified or described in the Bidding Documents that a substitute or “or-equal” item of material or equipment may be furnished or used by Contractor if acceptable to Engineer, application for such acceptance will not be considered by Engineer until after the Effective Date of the Bid Form and Summary of Work.

**ARTICLE 11 – SUBCONTRACTORS, SUPPLIERS, AND OTHERS**

11.1 The Bidder shall submit with the Bid to Owner a list of all such Subcontractors, Suppliers, individuals, or entities proposed for those portions of the Work for which such identification is required. Such list shall be accompanied by an experience statement with pertinent information regarding similar projects and other evidence of qualification for each such Subcontractor, Supplier, individual, or entity, Owner may, before the Notice of Award is given, request apparent Successful Bidder to submit a substitute, in which case apparent Successful Bidder shall submit an acceptable substitute, Bidder’s Bid price will be increased (or decreased) by the difference in cost occasioned by such substitution, and Owner may consider such price adjustment in evaluating Bids and making the Contract award.

11.2 If apparent Successful Bidder declines to make any such substitution, Owner may award the Contract to the next lowest Bidder that proposed to use acceptable Subcontractors, Suppliers, individuals, or entities. Declining to make requested substitutions will not constitute grounds for forfeiture of the Bid security of any Bidder. Any Subcontractor, Supplier, individual, or entity so listed and against which Owner makes no written objection prior to the giving of the Notice of Award will be deemed acceptable to Owner subject to revocation of such acceptance after the Effective Date of the Agreement.

11.3 Contractor shall not be required to employ any Subcontractor, Supplier, individual, or entity against whom Contractor has reasonable objection.

**ARTICLE 12 – PREPARATION OF BID**

12.1 The Bid form is included with the Bidding documents.

12.2 All blanks on the Bid Form shall be completed by printing in ink or by typewrite and the Bid signed in

ink. Erasures or alterations shall be initialed in ink by the person signing the Bid Form. A Bid price shall be indicated for each alternative, and unit price item listed therein, or the words “No Bid,” “No Change,” or “Not Applicable” entered.

- 12.3 A Bid by a corporation shall be executed in the corporate name by the president or a vice-president or other corporate officer accompanied by evidence of authority to sign. The corporate seal shall be affixed and attested by the secretary or an assistant secretary. The corporate address and state of incorporations shall be shown below the seal.
- 12.4 A Bid by a partnership shall be executed in the partnership name and signed by a partner (whose title must appear under the signature), accompanied by evidence of authority to sign. The official address of the partnership shall be shown below the signature.
- 12.5 A Bid by a limited liability company shall be executed in the name of the firm by a member and accompanied by evidence of authority to sign. The state of formation of the firm and the official address of the firm shall be shown below the signature.
- 12.6 A Bid by an individual shall show the Bidder’s name and official address.
- 12.7 A Bid by a joint venture shall be executed by each joint venture in the manner indicated on the Bid Form. The official address of the joint venture shall be shown below the signature.
- 12.8 All names shall be typed or printed in ink below the signatures.
- 12.9 The Bid shall contain an acknowledgement of receipt of all Addenda, the numbers of which shall be filled in on the Bid Form.
- 12.10 The address and telephone number for communications regarding the Bid shall be shown.
- 12.11 The Bid shall contain evidence of Bidder’s authority and qualification to do business in the state where the Project is located or covenant to obtain such qualification prior to award of the Contract. Bidder’s state contractor license number, if any, shall also be shown on the Bid Form.

**ARTICLE 13 – BASIS OF BID; COMPARISON OF BIDS**

**13.1 Unit Price**

- A. Bidders shall submit a Bid on a unit price basis for each item of Work listed in the Bid Schedule.
- B. The total of all estimated prices will be the sum of the products of the estimated quantity of each item and the corresponding unit price. The final quantities and Contract Price will be determined in accord with the General Conditions.
- C. Discrepancies between the multiplication of units of Work and unit prices will be resolved in

favor of the unit prices. Discrepancies between the indicated sum of any column of figures and the correct sum thereof will be resolved in favor of the correct sum. Discrepancies between words and figures will be resolved in favor of the words.

**ARTICLE 14 – SUBMITTAL OF BID**

14.1 A Bid shall be submitted no later than date and time prescribed and at place indicated in Advertisement for Bids and shall be submitted electronically using the QuestCDN online bidding vBid platform. No paper bids will be accepted.

14.2 See Bid Form for a list of documents typically required to be submitted with the Bid.

**ARTICLE 15 – MODIFICATION AND WITHDRAWAL OF BID**

15.1 A Bid may be modified or withdrawn by an appropriate document duly executed in the manner that a Bid must be executed and delivered to the place where Bids are to be submitted prior to the date and time for the opening of Bids.

15.2 If within 24 hours after Bids are opened, any Bidder files a duly signed written notice with Owner and promptly thereafter demonstrates to the reasonable satisfaction of Owner that there was a material and substantial mistake in the preparation of its Bid, that Bidder may withdraw its Bid, and the Bid security will be returned. Thereafter, if the Work is rebid, that Bidder will be disqualified from further bidding on the Work.

**ARTICLE 16 – OPENING BIDS**

16.1 Bids will be opened as indicated in the Advertisement to Bid. The bid opening can be viewed live via the GoToMeeting information shown below. An abstract of the amounts of the base bids and major alternatives, if any, will be made available to bidders after opening the bids.

The bid opening can be viewed live via GoToMeeting as follows:

**ARTICLE 17 – BIDS REMAIN SUBJECT TO ACCEPTANCE**

- 17.1 All bids will remain subject to acceptance for the period of time stated in the General Conditions, but Owner may, in its sole discretion, release any Bid and return the Bid security prior to the end of this period.

**ARTICLE 18 – EVALUATION OF BIDS AND AWARD OF CONTRACT**

- 18.1 Owner reserves the right to reject any or all Bids, including without limitation, nonconforming, nonresponsive, unbalanced, or conditional Bids. Owner further reserves the right to reject the Bid of any Bidder whom it finds, after reasonable inquiry and evaluation, to not be responsible. Owner may also reject the Bid of any Bidder if Owner believes that it would not be in the best interest of the Project to make an award to that Bidder. Owner also reserves the right to waive all informalities not involving price, time, or changes in the Work and to negotiate contract terms with the Successful Bidder.
- 18.2 More than one Bid for the same Work from an individual or entity under the same or different names will not be considered. Reasonable grounds for believing that any Bidder has an interest in more than one Bid for the Work may be cause for disqualification of that Bidder and the rejection of all Bids in which that Bidder has an interest.
- 18.3 In evaluating Bids, Owner will consider whether or not the Bids comply with the prescribed requirements, and such alternates, unit prices and other data, as may be requested in the Bid Form or prior to the Notice of Award.
- 18.4 In evaluating Bidders, Owner will consider the qualifications of Bidders and may consider the qualifications and experience of Subcontractors, Supplier, and other individuals or entities proposed for those portions of the Work for which the identify of Subcontractors, Suppliers, and other individuals or entities must be submitted as provided in the Supplementary Conditions.
- 18.5 Owner may conduct such investigations as Owner deems necessary to establish the responsibility, qualifications, and financial ability of Bidders, proposed Subcontractors, Suppliers, individuals, or entities to perform the Work in accordance with the Contract Documents.
- 18.6 Bidder agrees to waive any claim it has or may have against the Owner and the respective employees arising out of or in connection with the administration, evaluation or recommendation of any Bid.
- 18.7 If the Contract is to be awarded, Owner will award the Contract to the lowest responsible responsive Bidder whose Bid is in the best interests of the Project.

**ARTICLE 19 – CONTRACT SECURITY AND INSURANCE**

- 19.1 The General Conditions set forth Owner's requirements as to performance and payment bonds and

insurance. When the Successful Bidder delivers the executed Agreement to Owner, it shall be accompanied by such bonds and a certificate of insurance.

**ARTICLE 20 – SIGNING OF AGREEMENT**

20.1 When Owner gives a Notice of Award to the Successful Bidder, it shall be accompanied by the required number of unsigned counterparts of the Agreement with the other Contract Documents which are identified in the Agreement as attached thereto. Within ten (10) days thereafter, Successful Bidder shall sign and deliver the required number of counterparts of the Agreement and attached documents to Owner. Within ten (10) days thereafter, Owner shall deliver one fully signed counterpart to Successful Bidder with a complete set of Drawings with appropriate identification.

**END OF SECTION**

**SECTION 00 41 13**

**CITY OF DE PERE**

**BID FORM**

**PROJECT 23-01**

This bid, submitted by the undersigned Bidder to the City of De Pere, in accordance with the Advertisement to Bid, which will be received until 1:00 PM, Wednesday, April 26, 2023 is to furnish and deliver all materials, and to perform and do all work on the project designated per Section 01 10 00 Summary of Work.

Bidder has examined and carefully prepared the bid from the plans and specifications and has checked the same in detail before submitting said proposal or bid; and that said bidder or bidder's agents, officer or employees have not, either directly or indirectly, entered into any agreement, participated in any collusion, or otherwise taken any action in restraint of free competitive bidding in connection with this proposal or bid.

Bidder has examined and carefully studied the Bidding Documents, other related data identified in the Bidding Documents, and the following Addenda, receipt of which is hereby acknowledged:

<u>Addendum No.</u>	<u>Addendum Date</u>
_____	_____
_____	_____

**BASIS OF BID:**

Bidder will complete the Work in accordance with the Contract documents for the following price(s):

As stated in the attached Unit Price Bid Schedule.

Unit Prices have been computed in accordance with the General Conditions.

Bidder acknowledges that estimated quantities are not guaranteed, and are solely for the purpose of comparison of Bids, and final payment for all Unit Price Bid items will be based on actual quantities, determined as provided in the Contract Documents.

**BID BOND**

KNOW ALL MEN BY THESE PRESENTS: That \_\_\_\_\_,

as Principal, hereinafter called Principal, and \_\_\_\_\_,

as Surety, hereinafter called Surety, are held and firmly bound unto the City of De Pere, a municipal corporation of the State of Wisconsin, as Obligee, hereinafter called City, in the amount of \_\_\_\_\_ dollars (\$\_\_\_\_\_) for the payment whereof Principal and Surety bind themselves, their heirs, executors, administrators, successors and assigns, jointly and severally, firmly by these presence.

WHEREAS, Principal has made a proposal to the City for furnishing all materials, labor, tools, equipment and incidentals necessary to complete the work of Project 23-01 in accordance with drawings and specifications prepared by the Director of Public Works of said City, which proposal is by reference made a part hereof, and is hereinafter referred to as the BID.

NOW, THEREFORE, THE CONDITION OF THIS OBLIGATION is such that, if Principal shall be awarded the contract for said project and Principal shall enter into a contract in accordance with the BID, then this obligation shall be null and void; otherwise it shall remain in full force and effect, provided that:

1. The liability of Surety shall in no event exceed the penalty of this bond.
2. Any suits at law or proceedings, in equity brought or to be brought against Surety to recover any claim hereunder shall be executed within six (6) months from the date of this instrument.

NOTICE OF AWARD

(Contractor)  
(Contractor Name)  
(Address)  
(Address)

Project Description: 23-01 Sewer and Water Relay and Street Resurfacing

The City has considered the proposal submitted by you dated (BID DATE) for the above-described project in response to its Advertisement for Bids dated April 7, 2023 and April 14, 2023.

You are hereby notified that the Common Council of the City of De Pere has accepted your bid of (Contract Amount \$\_\_\_\_\_.00).

You are required to execute the Contract and furnish the required Performance Bond, Payment Bond and Certificates of Insurance within ten (10) calendar days from the date of this notice to you.

If you fail to execute said Agreement and to furnish said bonds within ten (10) days from the date of this notice, said City will be entitled to consider all your rights arising out of the City's acceptance of your bid as abandoned and as a forfeiture of your Bid Bond. The City will be entitled to such other rights as may be granted by law.

You are required to return an acknowledged copy of this NOTICE OF AWARD to the City.

Dated this \_\_\_\_\_ day of \_\_\_\_\_ 2023.

Title: \_\_\_\_\_

SECTION 00 52 13

CONTRACT

This Contract, made and entered into this day \_\_\_\_\_ (date to be affixed by City), by and between (Contractor Name), hereinafter called Contractor, and the City of De Pere, a municipal corporation of the State of Wisconsin, hereinafter called City.

WITNESSETH: That, in consideration of the covenants and agreements herein contained, to be performed by the parties hereto, and of the payments hereinafter agreed to be made, it is mutually agreed as follows:

ARTICLE I - SCOPE OF WORK

The Contractor shall furnish all materials and all equipment and labor necessary, and perform all work shown on the drawings and described in the specifications for the project entitled Project 23-01 Sewer and Water Relay and Street Resurfacing, all in accordance with the requirements and provisions of the following documents, which are hereby made a part of this Contract:

- (a) Advertisement for Bids, dated April 7, 2023 and April 14, 2023.
- (b) Drawings designated for Project 23-01 Sewer and Water Relay and Street Resurfacing dated April 7, 2023.
- (c) City of De Pere 2022 Construction Specifications.
- (d) Special Provisions dated April 7, 2023.
- (e) Proposal submitted by (Contractor Name) dated Bid Date.
- (f) Addenda No. \_\_\_\_\_ dated \_\_\_\_\_

ARTICLE II - TIME OF COMPLETION

- (a) The work to be performed under the Contract shall be commenced within (number spelled out) (\_\_) calendar days after receipt of written notice to proceed. The work shall be completed within (Number spelled out) (\_\_) calendar days ) or (specific calendar dates) after receipt of Notice to Proceed.
- (b) Time is of the essence with respect to the date of completion herein above stated. Failure to complete the work within the number of calendar days stated in this Article, or interim dates included in the work sequence in Section 01 10 00, Summary of Work, including any extensions granted thereto, shall entitle the City to deduct from the monies due the Contractor an amount equal to Update based on 00 70 00 - General Conditions (Page 27)(\$) per day for each calendar day of delay in the completion of the work. Such amount shall be considered and treated not as a penalty but as liquidated damages, which the City will sustain, by failure of the Contractor to complete the work within the time stated.

ARTICLE III - PAYMENT

- (a) The Contract Sum. The City shall pay to the Contractor for the performance of the Contract the amounts determined for the total number of each of the following units of work completed at the unit price stated thereafter. The number of units contained in this schedule is approximate only, and the final payment shall be made for the actual number of units that are incorporated in or made necessary by the work covered by the Contract.
- (b) Progress Payments. The City shall make payments on account of the Contract as follows:
1. On not later than the fourth Friday of every month the Contractor shall present to the City an invoice covering an estimate of the amount and proportionate value of the work done as verified by the City under each item of work that has been completed from the start of the job up to and including the fourth Friday of the preceding month, and the value of the work so completed determined in accordance with the schedule of unit prices for such items, together with such supporting evidence as may be required. This invoice shall also include an allowance for the cost of such materials and equipment required in the permanent work as have been delivered to the site but not as yet incorporated in the work.
  2. On not later than the third week of the following month, the City shall, after deducting previous payments made, pay to the Contractor 95% of the amount of the approved invoice, retaining 5% of the estimate of work done until 50% of the work has been completed. At 50% completion of the work, the previous retainage shall not yet be paid, but further partial payments shall be made in full to the contractor without additional retainage being taken unless the engineer certifies that the work is not proceeding satisfactorily. If the work is not proceeding satisfactorily, additional amounts may be retained. After substantial completion, an amount retained may be paid to the contractor, keeping retained only such amount as is needed for the remaining work.
  3. The Contractor shall notify the City in writing when all work under this Contract has been completed. Upon receipt of such notice the City shall, within a reasonable time, make the final inspection and issue a final certificate stating that the work provided for in this Contract has been completed and is accepted under the terms and conditions thereof, and that the entire balance due the Contractor as noted in said final certificate is due and payable. Before issuance of the final certificate the Contractor shall submit evidence satisfactory to the City that payrolls, material bills, and other indebtedness connected with the work under this Contract have been paid. The City shall make final payment as soon after issuance of the final certificate as practicable.

ARTICLE IV – CONTRACT DOCUMENTS

(a) Contents

1. The Contract documents consist of the following:
  - a. This Contract (pages 00 52 13-1 to 0052-13-3, inclusive).
  - b. Payment bond (pages 00 61 13-1 to 00 61 13-2, inclusive).
  - c. Performance bond (page 00 61 16-1).
  - d. General Conditions (pages 00 70 00-1 to 00 70 00-27, inclusive).

- e. Specifications as listed in the table of contents of the Project Manual.
- f. Drawings consisting of \_\_\_ sheets with each sheet bearing the following general title: \_\_\_ [or] the Drawings listed on attached sheet index.
- g. Addenda (numbers \_\_\_ to \_\_\_ inclusive), dated \_\_\_\_\_.
- h. Exhibits to this Agreement (enumerated as follows):
  - 1) Contractor’s Bid (pages 00 41 13-1 to 00 41 13-3, inclusive).
  - 2) Bid Schedule – Unit Prices (Pages 00 41 43-1 to 00 41 43-, inclusive).
  - 3) Proposed Products Form (Page 00 43 33-1).
  - 4) Tabulation of Subcontractors (page 00 43 36-1).
  - 5) Documentation submitted by Contractor prior to Notice of Award (00 51 00-1).
- i. The following which may be delivered or issued on or after the Effective Date of the Agreement and are not attached hereto:
  - 1) Notice to Proceed (Page 00 55 00-1).
  - 2) Change Orders.

2. The documents listed in Paragraph (a) Contents, are attached to this Agreement (except as expressly noted otherwise above).

3. There are no Contract Documents other than those listed above in this Article IV.

IN WITNESS WHEREOF, the parties hereto have executed this Contract, the day and year first written above.

TITLE: \_\_\_\_\_

**SECTION 00 61 13**

**CITY OF DE PERE**

**PAYMENT BOND**

KNOW ALL MEN BY THESE PRESENTS: That **(CONTRACTOR NAME)**, as Principal, hereinafter called Contractor, and \_\_\_\_\_, as Surety, hereinafter called Surety, are held and firmly bound unto the City of De Pere, a municipal corporation of the State of Wisconsin, as Obligee, hereinafter called the City, for the use and benefit of claimants as herein below defined in the **amount of \_\_\_\_\_ (CONTRACT AMT. SPELLED OUT) (\$\_\_\_\_\_)** for the payment whereof Contractor and Surety bind themselves, their heirs, executors, administrators, successors and assigns, jointly and severally, firmly by these presents.

WHEREAS, Contractor has by written agreement dated \_\_\_\_\_ (date to be affixed by City) entered into a contract with City for Project 23-01, in accordance with drawings and specifications prepared by the Director of Public Works of said City, which contract is by reference made a part hereof, and is hereinafter referred to as the CONTRACT.

NOW, THEREFORE, THE CONDITION OF THIS OBLIGATION is such that, if Contractor shall promptly make payments to all claimants as hereinafter defined, for all labor and material used or reasonably required for use in the performance of the CONTRACT, then this obligation shall be null and void; otherwise it shall remain in full force and effect, subject, however, to the following conditions.

1. A claimant is defined as one having a direct contract with Contractor or with a subcontractor of Contractor for labor, material, or both, used or reasonably required for use in the performance of the contract, labor and material being construed to include that part of water, gas, power, lights, heat, oil, gasoline, telephone service, or rental of equipment directly applicable to the contract.
2. The above named Contractor and Surety hereby jointly and severally agree with the City that every claimant as herein defined, who has not been paid in full before the expiration of a period of ninety (90) days after the date on which the last of such claimant's work or labor was done or performed, or materials were furnished by such claimant may sue on this bond for the use of such claimant in the name of the City, prosecute the suit to final judgment for such sum or sums as may be justly due claimant, and have execution thereon, provided, however, that the City shall not be liable for the payment of any costs or expenses of any such suit.
3. No suit or action shall be commenced hereunder by any claimant:
  - a. Unless claimant shall have given written notice to any two of the following: The Contractor, the City, or the Surety above named, within ninety (90) days after such claimant did or performed the last of the work or labor, or furnished the last of the materials for which said claim is made, stating with substantial accuracy the amount claimed and the name of the party to whom the materials were furnished, or for whom the work or labor was done or performed. Such notice shall be served by mailing the same by registered mail, postage prepaid, in an envelope addressed to the Contractor, City, or Surety, at any place where an office is regularly maintained for the transaction of business, or served in any manner in which legal process may be served in the State of Wisconsin, save that such service need not be made by a public officer.

**Project 23-01  
Sewer and Water Relay and Street Resurfacing**

**City of De Pere**

- b. After the expiration of one (1) year following the date on which Contractor ceased work on said CONTRACT.
  - c. Other than in a state court of competent jurisdiction in and for the County or other political subdivision of the state in which the project, or any part thereof, is situated, or in the United States District Court for the district in which the project, or any part thereof, is situated, and not elsewhere.
4. The amount of this bond shall be reduced by and to the extent of any payment or payments made in good faith hereunder, inclusive of the payment by Surety of mechanics' liens, which may be filed or recorded against said improvement, whether or not claim for the amount of such lien be presented under and against this bond.

**SECTION 00 61 16**

**CITY OF DE PERE**

**PERFORMANCE BOND**

KNOW ALL MEN BY THESE PRESENTS: That **(CONTRACTOR'S NAME)**, as Principal, hereinafter called Contractor, and \_\_\_\_\_, as Surety, hereinafter called Surety, are held and firmly bound unto the City of De Pere, a municipal corporation of the State of Wisconsin, as Obligee, hereinafter called City, in the amount of **(AMOUNT WRITTEN OUT)** (\$\_\_\_\_\_) for the payment whereof Contractor and Surety bind themselves, their heirs, executors, administrators, successors and assign, jointly and severally, firmly by these presents.

WHEREAS, Contractor has by written agreement dated \_\_\_\_\_ (date to be affixed by City), entered into a contract with the City for Project 23-01, in accordance with drawings and specifications prepared by the Director of Public Works of said City, which contract is by reference made a part hereof, and is hereinafter referred to as the CONTRACT.

NOW THEREFORE, THE CONDITION OF THIS OBLIGATION is such that, if the Contractor shall promptly and faithfully perform said CONTRACT, then this obligation shall be null and void; otherwise it shall remain in full force and effect.

Whenever Contractor shall be, and declared by the City to be in default under the CONTRACT, the City having performed City's obligations there under, the Surety may promptly remedy the default, or shall promptly

1. Complete the CONTRACT in accordance with its terms and conditions or
2. Obtain a bid or bids for submission to City for completing the CONTRACT in accordance with its terms and conditions, and upon determination by the City and Surety of the lowest responsible bidder, arrange for a contract between such bidder and City make available as work progresses (even though there should be a default or succession of defaults under the contract or contracts of completion arranged under this paragraph) sufficient funds to pay the cost of completion less the balance of the contract price; but not exceeding, including other costs and damages for which the Surety may be liable hereunder, the amount set forth in the first paragraph hereof. The term "balance of the contract price" as used in this paragraph shall mean the total amount payable by City to Contractor under the CONTRACT and any amendments thereto, less the amount properly paid by City to Contractor.

Any suit under this bond must be instituted before the expiration of two (2) years from the date on which final payment under the CONTRACT falls due. No right of action shall accrue on this bond to or for the use of any person or corporation other than the owner named herein or the heirs, executors, administrators or successors of City.

**1.2 REFERENCES**

- A. General Specifications. The work under this contract shall be in accordance with the City of De Pere, 2022 Construction Specifications and these Special Provisions and plans, and the latest edition of the Wisconsin Department of Transportation Standards Specifications for Highway and Structure Construction, where referenced in the City Specifications.
- B. Definitions. Any reference to the “state” or the “department” in said Standard Specifications shall mean the “City of De Pere” for the purposes of this contract.
- C. Industry Standards
  - 1. Unless the Contract Documents include more stringent requirements, applicable construction industry standards have the same force and effect as if bound or copied directly into the Contract Documents to the extent referenced. Such standards are made a part of the Contract Documents by reference.
  - 2. Comply with standards in effect as of date of the Contract Documents, unless otherwise indicated.
  - 3. If compliance with two or more standards is specified and the standards establish different or conflicting requirements for minimum quantities or quality levels, comply with the most stringent requirement.
  - 4. The quantity or quality level shown or specified shall be the minimum provided or performed. The actual installation may comply exactly with the minimum quantity or quality specified, or it may exceed the minimum within reasonable limits. To comply with these requirements, indicated numeric values are minimum or maximum, as appropriate, for the context of requirements.

5. Each section of the specifications generally includes a list of reference standards normally referred to in that respective section. The purpose of this list is to furnish the Contractor with a list of standards normally used for outlining the quality control desired on the project. The lists are not intended to be complete or all inclusive, but only a general reference of standards that are regularly referred to.
6. Each entity engaged in construction on the Project shall be familiar with industry standards applicable to its construction activity. Copies of applicable standards are not bound with the Contract Documents. Where copies of standards are needed to perform a required construction activity, obtain copies directly from the publication source and make them available on request.

### 1.3 WORK COVERED BY THE CONTRACT DOCUMENTS

#### A. Project Identification

##### 1. Project Location

- a. Reid Street from Allard Street to Main Avenue Annex.
- b. Main Avenue Annex from Reid Street to S. Seventh Street.
- c. S. Seventh Street from Main Avenue to terminus south of Reid Street.
- d. Alley from S. Seventh Street to Allard Street between Main Avenue and Reid Street.
- e. Wilcox Court from Fox River Drive to eastern termini.
- f. Miscellaneous repairs around the City per the plans.

##### 2. Work will be performed under the following prime contract:

- a. 23-01 Sewer and Water Relay and Street Resurfacing.

#### B. The Work includes:

1. Sanitary sewer lateral relay and new.
2. Storm sewer and associated appurtenances relay and new.
3. Water main and associated appurtenances relay and new.
4. Concrete curb and gutter slip form and/or spot repairs.
5. Concrete driveway aprons, pedestrian ramps, and sidewalk removal and repairs.
6. Pulverize or mill existing asphaltic concrete pavement.
7. Salvage pulverized material to City.
8. Asphaltic concrete paving.
9. Terrace restoration.
10. Erosion control.
11. Traffic control.

### 1.4 WORK SEQUENCE/SCHEDULE

#### A. Project shall be completed by October 15, 2023.

#### B. The calendar days listed on the following table are the allowed durations for each location from the beginning of construction of the street or site to the substantial completion of the area. Work in each area shall be continuous without crews and equipment mobilizing and

demobilizing to complete work outside of this project scope unless designated or approved by the Project Engineer.

<b>Location</b>	<b>Calendar Days</b>
Reid Street, Main Avenue Annex, S. Seventh Street and Alley from S. Seventh Street to Allard Street between Main Avenue and Reid Street	120 Calendar Days
Wilcox Court	60 Calendar Days
S. Ninth Street Sanitary Lateral Relay	7 Calendar Days

- C. Conduct construction activities to maintain access to businesses and residences throughout construction.
- D. Topsoil, seed, and mulch shall be completed prior to asphaltic concrete pavement placement.
- E. The following sanitary sewer spot repairs shall be completed by June 23, 2023 in coordination with Project 23-03 Sewer Lining.:
  - 1. Main Avenue Annex – 8” Sanitary Sewer Offset Joint Repair.
  - 2. Main Avenue – Raise Manhole at 627/633 Main Avenue.
  - 3. Moonglow Drive at S. Ninth Street – 8” Sanitary Sewer Repair.
  - 4. Driftwood Drive – 8” Sanitary Repair at Sag.
- F. The following work shall be completed by August 18, 2023 in advance of the 2023-2024 school year starting:
  - 1. S. Washington Street Spot Repair.
  - 2. S. Huron Street Spot Repair at Merrill Street.
  - 3. Shetland Spot Repair.
  - 4. S. Ninth Street sanitary lateral relay.
- G. Work on Merrill Street will need to be completed outside of peak traffic hours. Work shall be completed between 9:00 AM and 3:00 PM. Work may again resume after 6:00 PM if needed.

**1.5 USE OF PREMISES**

- A. Contractor shall have full use of the premises for construction operations, including use of the Project Site, as allowed by law, ordinances, permits, easement agreements and the Contract documents.
- B. Contractor’s use of premises is limited only by Owner’s right to perform work or to retain other contractors on portions of the Project.
- C. The Project Site is limited to property boundaries, rights-of-way, easements, and other areas designated in the Contract Documents.

- D. Provide protection and safekeeping of material and products stored on or off the premises.
- E. Move any stored material or products which interfere with operations of Owner or other Contractors.

**1.6 WARRANTY**

- A. The Contractor warrants and guarantees to the City that all work shall be in accordance with the Contract Documents and will not be defective. Prompt notice of all defects will be given to the Contractor. All defective work, whether or not in place, may be rejected, corrected or accepted as provided in this proposal.
- B. If within one (1) year after the date of contract work completion or such longer period of time as may be prescribed by law or by the terms of any applicable special guarantee required by the Contract Documents or by a special provision of the Contract Documents, any work is found to be defective, the Contractor shall comply in accordance with the City's written instructions. These written instructions will include either correcting such defective work or, if it has been rejected by the City, removing it from the site and replacing it with non-defective work. If the Contractor does not promptly comply with the terms of such instructions, or in an emergency where delay would cause serious risk or loss or damage, the City may have the defective work corrected or the rejected work removed and replaced. All direct and indirect costs of correction or removal and replacement of defective work, including compensation for additional professional services, shall be paid by the Contractor.

**1.7 WORK BY OTHERS**

- A. The City of De Pere Park Department will trim trees in conflict with construction if the City receives advanced notification. Questions regarding trees or landscaping that is bid as part of this contract can be directed to the Engineer.
- B. Owner has awarded a separate contract for performance of certain construction operations which will be conducted at the Project Site simultaneously with work under this Contract. This Contract includes the following:
  - 1. Project 23-03 Sewer Lining. Sewer lining will occur at the following locations in coordination with this work. No conflicts are anticipated:
    - a. Moonglow Drive
    - b. Main Avenue Annex from Main Avenue to Reid Street
    - c. Driftwood Drive
  - 2. Project 23-05 Sidewalk and Curb Repairs. Sidewalk installation and repair work will occur after work under this contract at Kelly Danen Park.
- C. Cooperate fully with separate contractors and/or Owner so work by others may be carried out smoothly, without interfering with or delaying work under this Contract.

1.8 PROJECT UTILITY SOURCES

- A. Green Bay Metropolitan Sewer District (NEW Water), Lisa Sarau, ([lsarau@newwater.us](mailto:lsarau@newwater.us)) (920-438-1039)
- B. AT&T, Victoria Kassab, ([vk352k@att.com](mailto:vk352k@att.com)) (920-401-7512)
- C. Wisconsin Public Service, Bob Laskowski, ([rtlaskowski@wisconsinpublicservice.com](mailto:rtlaskowski@wisconsinpublicservice.com)) (920-617-2775)
- D. Charter, Vince Albin, ([vince.albin@charter.com](mailto:vince.albin@charter.com)) (920-378-0444)
- E. Nsight, Rick Vincent, ([rick.vincent@nsight.com](mailto:rick.vincent@nsight.com)) (920-617-7316)
- F. TDS Metrocom, Steve Jakubiec, ([steve.jakubiec@tdstelecom.com](mailto:steve.jakubiec@tdstelecom.com)) (920-882-4166)
- G. Net-Lec (Mi-Tech Services), Dennis Lafave, ([dlafave@mi-tech.us](mailto:dlafave@mi-tech.us)) (920-619-9774)
- H. CenturyLink, Relocation Team, ([relocations@lumen.com](mailto:relocations@lumen.com)) (800-871-9244)
- I. Central Brown County Water Authority, Rob Michaelson, ([rmichaelson@mpu.org](mailto:rmichaelson@mpu.org)) (920-686-4354)

1.9 MISCELLANEOUS PROVISIONS

- A. Notification to Residents –notify individually all residents and businesses 2-weeks prior to the start of operations, giving an estimated time that vehicle movement will be limited or prohibited. Property owners shall be notified 24-hours prior to closing a drive.
- B. Ingress and egress to the site of work for delivery of materials, hauling of excavation, daily construction activities and all vehicular traffic shall be as follows:
  - 1. Reid Street, Main Avenue Annex, S. Seventh Street and Alley work shall be accessed via Main Avenue or Allard Street via Main Avenue.
  - 2. Wilcox Court Shall be accessed from Fox River Drive via Cook Street and S. Broadway Street.
  - 3. Shetland Spot Repair shall be accessed via the walking path south of Shetland Court.
  - 4. The remaining spot repairs shall be accessed via the most direct route off the City of De Pere designated truck routes. The truck route map can be found at:  
[https://www.deperewi.gov/egov/documents/1673556768\\_98235.pdf](https://www.deperewi.gov/egov/documents/1673556768_98235.pdf)
- C. Reid Street shall be pulverized per the plans. Four (4) inches of pulverized material shall be removed to accommodate the four (4) inches of asphaltic concrete pavement. If the Contractor desires, the City will accept pulverized material and the material can be trucked and stockpiled at the De Pere Compost Facility at 655 Rockland Road. Stockpiles will need to be shaped and maintained by the contractor until trucking operations are completed.

SECTION 01 22 01

MEASUREMENT AND PAYMENT SANITARY SEWER

PART 1 – GENERAL

1.1 SUMMARY

- |   |                     |
|---|---------------------|
| A. Section includes:                        | <u>Bid Item No.</u> |
| 1. Sanitary Sewer Mains (Granular Backfill) | SS-01               |
| 2. Sanitary Sewer Laterals                  | SS-02 & SS-03       |
| 3. Sanitary Sewer Service Branches          | SS-04 & SS-05       |
| 4. Sanitary Sewer Risers                    | SS-06               |
| 5. Sanitary Sewer Manholes                  | SS-07 & SS-08       |
| 6. Dig Down and Verify Active Lateral       | SS-09 & SS-10       |
| 7. Connect to Existing Sanitary Sewer Main  | SS-11               |
| 8. Sanitary Sewer Spot Repair               | SS-12               |
- B. Unit Prices include:
1. Defined work for each Unit Price Item which will provide a functionally complete Project when combined with all unit price items. If there are specific work items which the Contractor believes are not identified in any Unit Price Item, but is required to provide a functionally complete Project, then the identified specific work items shall be included in the appropriate Unit Price Item.
  2. The method of measurement for payment.
  3. The price per unit for payment.

1.2 GENERAL WORK ITEMS

- A. Include with the appropriate Unit Price Item the following work items which are common to the Unit Price Items for sanitary sewer systems.
- B. If there is a specific Unit Price Item for any of the following items, then the work item shall be included with that specific unit price item.
1. Traffic Control.
  2. Sawcutting asphalt and/or concrete.
  3. Removal, hauling and disposal of surface materials including road pavement, curb and gutter, sidewalk, driveways and other pavement surfaces in the trench area and as shown on the drawings.
  4. Dewatering.
  5. Bypass pumping.
  6. Excavation.
  7. Open Trench installation method (unless bid item specifies other method).
  8. Pipe Bedding.

9. Backfilling and compacting native obtained from the excavation.
10. Supplying, hauling, backfilling and compacting granular material.
11. Loading, hauling and disposing of surplus excavated material.
12. Landscaping – turf establishment surface restoration and trees and bushes damaged during construction.
13. Maintenance, protection, replacement and/or repair of facilities not designated for alteration on the Site beyond the limits identified.
14. Site access requirements including temporary aggregate material as required for local traffic access.
15. Bulkhead and abandoned existing sanitary sewer with flowable fill as shown on Drawings.
16. If crossing or undermining of existing public or private utility, then include:
  - a. Maintaining the utility in service.
  - b. Replacing of existing utilities, if damaged.
  - c. Providing support and bedding material.
17. Dust control.
18. Remove and replace existing mailboxes and traffic signs.
19. Restroom facilities.
20. Easement and right-of-way requirements.
21. Construction staking and other survey work not provided by the Engineer.
22. Regulatory requirements.
23. Preconstruction videotaping and video equipment.
24. Quality assurance and quality control testing and inspections.
25. Shop drawings and other submittals.

**1.3 SANITARY SEWER MAINS (GRANULAR BACKFILL)**

- A. The unit price for Sanitary Sewer Main (Granular Backfill) work includes:
  1. General Work Items of Article 1.2.
  2. Sanitary sewer pipe and fittings of material stated in the Unit Price Bid Schedule and installed using the open trench method.
  3. Excavation, breakdown and removal of abandoned piping inside the trench area, including plugging of existing connections.
  4. Excavation, breakdown and removal of abandoned pipeline structures inside the trench area, including plugging of existing connections.
  5. Clay anti-seepage collar around pipe.
- B. Measurement of payment will be the actual horizontal length along the centerline of the installed sewer from centerline of the manhole to centerline of manhole with no deductions for manholes, sewer services branches and other fittings.
- C. The unit of measurement for payment is linear feet.

**1.4 SANITARY SEWER LATERALS**

- A. The unit price for Sanitary Sewer Laterals work includes:
  - 1. General Work Items of Article 1.2.
  - 2. Sanitary sewer lateral pipe and fittings of the material stated in the Unit Price Bid Schedule and installed using the open trench method.
  - 3. Watertight plug in the end of the sewer service lateral or connection including transition coupling to the existing building sewer lateral.
  - 4. Tracer wire.
  - 5. Install an 8' – 4" X 4" board at the end of the lateral.
  - 6. Directional drilling of sanitary service on S. Ninth Street.
  
- B. Measurement of payment will be the actual horizontal length along the centerline of the installed sewer service lateral pipe (excluding risers) from centerline of the service branch to the end of the pipe at the right of way, easement or existing sewer service lateral with no deductions for fittings.
  
- C. The unit of measurement for payment is linear feet.

**1.5 SANITARY SEWER SERVICE BRANCHES**

- A. The unit price for Sanitary Sewer Service Branches work includes:
  - 1. General Work Items of Article 1.2.
  - 2. Sanitary sewer service branches of same material strength or better than sanitary sewer main pipe.
  - 3. Installation along with the sanitary sewer main pipe installation.
  - 4. Plug (where required).
  
- B. Measurement for payment will be the actual number installed.
  
- C. The unit of measurement for payment is each.

**1.6 SANITARY SEWER RISERS**

- A. The unit price for Sanitary Sewer Risers work includes:
  - 1. General Work Items of Article 1.2.
  - 2. Sanitary sewer riser pipe and fittings of material stated in the Unit Price Bid Schedule and installed using the open trench method.
  - 3. Risers to be installed at the right of way (existing construction if existing lateral is too shallow).
  - 4. Tracer wire.

- B. Measurement for payment will be the actual length of pipe along the centerline of the installed sewer service riser pipe from centerline of fitting to centerline of fitting having a vertical rise of 45 degrees or greater with no deductions for fittings.
- C. The unit of measurement for payment is linear feet.

**1.7 SANITARY SEWER MANHOLES**

- A. The unit price for Sanitary Sewer Manholes work includes:
  - 1. General Work Items of Article 1.2.
  - 2. Precast reinforced concrete components.
  - 3. Joint flexible gasket material.
  - 4. Resilient flexible connector between the manhole structure and the sewer pipe.
  - 5. Adjusting rings and bituminous plastic cement sealant at chimney.
  - 6. Manhole steps.
  - 7. Manhole frame and cover (Neenah Foundry R-1500 Manhole Cover with Non-Rocking Lid or equal). Sanitary Sewer manhole covers shall have gaskets and concealed pick holes.
  - 8. Bedding material.
  - 9. Sewer pipe stub with connections and watertight plug (where required).
  - 10. Final casting adjustment.
- B. Measurement for payment will be the distance from the invert of the lowest sewer to the top of the frame and cover as set.
- C. The unit of measurement for payment is vertical feet.

**1.8 DIG DOWN AND VERIFY ACTIVE SANITARY LATERAL**

- A. The unit price for Dig Down and Verify Active Sanitary Lateral work includes:
  - 1. General Work Items of Article 1.2.
  - 2. Televis or excavate down to existing sanitary sewer lateral to expose the existing lateral to verify if the lateral is active.
  - 3. Assist City staff with televising. City staff will provide a push camera to televise the lateral.
  - 4. City staff will dye test the lateral if needed.
  - 5. Backfilling and compacting.
  - 6. Cap lateral if not active.
  - 7. Spot lining through inactive lateral to seal off connection (if applicable).
- B. Measurement for payment will be the actual number completed.
  - 1. This item only applies to laterals on existing main that are capped at the main.
  - 2. Laterals that are reconnected will be paid under a separate bid item.
- C. The unit of measurement for payment is each.

**1.9 CONNECT TO EXISTING SANITARY SEWER MAIN**

- A. The unit price for Reconnect to Connect to Existing Sanitary Sewer Main work includes:
  - 1. General Work Items of Article 1.2.
  - 2. Sanitary Sewer Pipe same material strength or better than sewer main. Provide Fernco with stainless steel sheer bands and connection water tight seal.
  - 3. Backfilling and compacting.
- B. Measurement for payment will be the actual number completed.
- C. The unit of measurement for payment is each.

**1.10 SANITARY SEWER SPOT REPAIR**

- A. The unit price for Sanitary Sewer Spot Repair work includes:
  - 1. General Work Items of Article 1.2.
  - 2. Excavating.
  - 3. Exposing sanitary sewer line for repairs.
  - 4. Remove and replace pipe (if applicable).
  - 5. Connection to existing sanitary sewer (if applicable).
  - 6. Repairing offset joints where present.
  - 7. Reconnecting to lateral where present with wye.
- B. Measurement for payment will be the actual number of repairs completed.
- C. The unit of measurement for payment is each.

END OF SECTION

SECTION 01 22 02

MEASUREMENT AND PAYMENT STORM SEWER

PART 1 – GENERAL

1.1 SUMMARY

- A. Section includes:
- |  | <u>Bid Item No.</u>                       |
|--|---|
| 1. Storm Sewer Mains (Granular Backfill)         | ST-01, ST-02, ST-03, ST-04, ST-06 & ST-07 |
| 2. Storm Sewer Mains (Natural Backfill)          | ST-05                                     |
| 3. Storm Sewer Laterals                          | ST-08                                     |
| 4. Storm Sewer Service Branches                  | ST-09 & ST-10                             |
| 5. Storm Sewer Manholes                          | ST-11 & ST-12                             |
| 6. Catch Basin/Inlets                            | ST-13, ST-14, ST-15, ST-16 & ST-17        |
| 7. Flared End Section                            | ST-18                                     |
| 8. Connect to Storm Structure                    | ST-19                                     |
| 9. Connect to Existing Storm Sewer Pipe          | ST-20                                     |
| 10. Storm Sewer Dig Down Spot Repair             | ST-21 & ST-22                             |
| 11. Abandon/Remove Storm Sewer and Appurtenances | ST-23                                     |
- B. Unit Prices include:
1. Defined work for each Unit Price Item which will provide a functionally complete Project when combined with all unit price items. If there are specific work items which the Contractor believes are not identified in any Unit Price Item, but is required to provide a functionally complete Project, then the identified specific work items shall be included in the appropriate Unit Price Item.
  2. The method of measurement for payment.
  3. The price per unit for payment.

1.2 GENERAL WORK ITEMS

- A. Include with the appropriate Unit Price Item the following work items which are common to the Unit Price Items for storm sewer systems.
- B. If there is a specific Unit Price Item for any of the following items, then the work item shall be included with that specific unit price item.
1. Traffic Control.
  2. Sawcutting asphalt and/or concrete.
  3. Removal, hauling and disposal of surface materials including road pavement, curb and gutter, sidewalk, driveways and other pavement surfaces in the trench area and as shown on the drawings.
  4. Dewatering.
  5. Excavation.

6. Open trench installation method (unless bid item specifies other method).
7. Pipe bedding.
8. Backfilling and compacting native obtained from the excavation.
9. Supplying, hauling, backfilling and compacting granular material.
10. Loading, hauling and disposing of surplus excavated material.
11. Landscaping – turf establishment surface restoration and trees and bushes damaged during construction.
12. Maintenance, protection, replacement and/or repair of facilities not designated for alteration on the Site beyond the limits identified.
13. Site access requirements including temporary aggregate material as required for local traffic access.
14. Bulkhead and abandon existing storm sewer with flowable fill as shown on drawings.
15. If crossing or undermining of existing public or private utility, then include:
  - a. Maintaining the utility in service.
  - b. Replacing of existing utilities, if damaged.
  - c. Providing support and bedding material.
16. Dust control.
17. Remove and replace existing mailboxes and traffic signs.
18. Restroom facilities.
19. Easement and right-of-way requirements.
20. Construction staking and other survey work not provided by the Engineer.
21. Regulatory requirements.
22. Preconstruction videotaping and video equipment.
23. Quality assurance and quality control testing and inspections.
24. Shop drawings and other submittals.

**1.3 STORM SEWER MAINS (GRANULAR BACKFILL)**

- A. The unit price for Storm Sewer Main (Granular Backfill) work includes:
  1. General Work Items of Article 1.2.
  2. Storm sewer pipe and fittings of material stated in the Unit Price Bid Schedule and installed using the open trench method.
  3. Excavation, breakdown and removal of abandoned piping inside the trench area, including plugging of existing connections.
  4. Excavation, breakdown and removal of abandoned pipeline structures inside the trench area, including plugging of existing connections.
- B. Measurement of payment will be the actual horizontal length along the centerline of the installed sewer from centerline of the manhole to centerline of manhole with no deductions for manholes, sewer services branches and other fittings.
- C. The unit of measurement for payment is linear feet.

**1.4 STORM SEWER MAINS (NATURAL BACKFILL)**

- A. The unit price for Storm Sewer Main (Natural Backfill) work includes:
  - 1. General Work Items of Article 1.2.
  - 2. Storm sewer pipe and fittings of material stated in the Unit Price Bid Schedule and installed using the open trench method.
  - 3. Excavation, breakdown and removal of abandoned piping inside the trench area, including plugging of existing connections.
  - 4. Excavation, breakdown and removal of abandoned pipeline structures inside the trench area, including plugging of existing connections.
- B. Measurement of payment will be the actual horizontal length along the centerline of the installed sewer from centerline of the manhole to centerline of manhole with no deductions for manholes, sewer services branches and other fittings.
- C. The unit of measurement for payment is linear feet.

**1.5 STORM SEWER LATERALS**

- A. The unit price for Storm Sewer Laterals work includes:
  - 1. General Work Items of Article 1.2.
  - 2. Storm sewer lateral pipe and fittings of the material stated in the Unit Price Bid Schedule and installed using the open trench method.
  - 3. Watertight plug in the end of the sewer service lateral or connection including transition coupling to the existing building sewer lateral.
  - 4. Tracer wire.
  - 5. Install an 8' – 4" X 4" board at the end of the lateral.
- B. Measurement of payment will be the actual horizontal length along the centerline of the installed sewer service lateral pipe from centerline of the service branch to the end of the pipe at the right of way, easement or existing sewer service lateral with no deductions for fittings.
- C. The unit of measurement for payment is linear feet.

**1.6 STORM SEWER SERVICE BRANCHES/INSERTA TEES**

- A. The unit price for Storm Sewer Service Branches/Inserta Tees work includes:
  - 1. General Work Items of Article 1.2.
  - 2. Storm sewer service branches of same material strength or better than storm sewer main pipe (where required).
  - 3. Core drilling into concrete storm sewer main (where required).
  - 4. Installation along with the storm sewer main pipe installation.
  - 5. Plug (where required).

- B. Measurement for payment will be the actual number installed.
- C. The unit of measurement for payment is each.

**1.7 STORM SEWER MANHOLES**

- A. The unit price for Storm Sewer Manholes work includes:
  - 1. General Work Items of Article 1.2.
  - 2. Precast reinforced concrete components.
  - 3. Joint flexible gasket material.
  - 4. Grout seal between the manhole and structure and the sewer pipe.
  - 5. Adjusting rings and bituminous plastic cement sealant at chimney.
  - 6. Manhole steps.
  - 7. Manhole frame and cover.
  - 8. Bedding material.
  - 9. Sewer pipe stub with connections and watertight plug (where required).
  - 10. Final casting adjustment.
- B. Measurement for payment will be the distance from the invert of the lowest sewer to the top of the frame and cover as set.
- C. The unit of measurement for payment is vertical feet.

**1.8 CATCH BASIN/INLETS**

- A. The unit price for Catch Basin/Inlets work includes:
  - 1. General Work Items of Article 1.2.
  - 2. Precast reinforced concrete components.
  - 3. Joint flexible gasket material.
  - 4. Grout seal between the catch basin/inlet structure and the sewer pipe.
  - 5. Adjusting rings grouted in place.
  - 6. Casting frame and grate.
  - 7. Bedding material.
  - 8. Supply and install 6 to 10 feet of 4 inch flexible perforated plastic pipe with geotextile wrap subgrade drain.
  - 9. Sand fill and Class "B" concrete floor and flow line.
  - 10. Temporary cover over catch basin/inlet to prevent eroded materials from entering.
  - 11. Final casting adjustment.
- B. Measurement for payment will be the actual number installed.
- C. The unit of measurement for payment is each.

**1.9 FLARED END SECTION**

- A. The unit price for Flared End Section includes:
  - 1. General Work Items of Article 1.2.
  - 2. Precast concrete components.
  - 3. Anchors to storm sewer pipe.
- B. Measurement for payment will be the actual number installed.
- C. The unit of measurement for payment is each.

**1.10 CONNECT TO STORM STRUCTURE**

- A. The unit price for Connect to Storm Structure work includes:
  - 1. General Work Items of Article 1.2.
  - 2. Modify existing storm sewer manhole opening (where required).
  - 3. Provide concrete around the pipe, gasket, and manhole opening to form a sediment tight seal.
  - 4. Reform flow line in existing storm manhole.
- B. Measurement for payment will be the actual number complete.
- C. The unit of measurement for payment is each.

**1.11 CONNECT TO EXISTING STORM SEWER PIPE**

- A. The unit price for Connect to Existing Storm Sewer Pipe work includes:
  - 1. General Work Items of Article 1.2.
  - 2. Storm sewer pipe same material strength or better than sewer main. Provide Fernco with stainless steel sheer bands and connection water tight seal.
  - 3. Bends as required in the field.
  - 4. Backfilling and compaction.
- B. Measurement for payment will be the actual number complete.
- C. The unit of measurement for payment is each.

**1.12 STORM SEWER DIG DOWN SPOT REPAIR**

- A. The unit price work for Storm Sewer Dig Down Spot Repair work includes:
  - 1. General Work Items of Article 1.2.
  - 2. Excavation.
  - 3. Exposing storm sewer line for repairs.
  - 4. Sawing existing storm sewer.

5. Remove and replace pipe.
6. Connection to existing storm sewer.
7. Repairing offset joints where present.
8. Clearing debris from storm sewer line.
9. Reestablishing end walls where present.

B. Measurement for payment will be the actual number completed.

C. The unit of measurement for payment is each.

**1.13 ABANDON/REMOVE STORM SEWER AND APPURTENANCES**

A. The unit price for Abandon/Remove Storm Sewer and Appurtenances work includes:

1. General Work Items of Article 1.2.
2. Excavating
3. Install bulkheads and abandon storm sewer and/or structures.
4. Removing existing storm sewer and/or structures where in conflict with other utilities.
5. Providing and placing flowable fill.
6. Backfilling and compacting.
7. Removal and disposal as shown on the Drawings.

B. Measurement for payment will not be made. This includes all of the project area.

C. The unit of measurement for payment is lump sum.

END OF SECTION

SECTION 01 22 03

MEASUREMENT AND PAYMENT WATER SYSTEM

PART 1 – GENERAL

1.1 SUMMARY

- A. Section includes:
- |   | <u>Bid Item No.</u>     |
|---|-------------------------|
| 1. Water Mains (Granular Backfill)                        | W-01 & W-04             |
| 2. Water Mains (Natural Backfill)                         | W-02 & W-03             |
| 3. Water Services   | W-05                    |
| 4. Corporation and Curb Stop                              | W-06                    |
| 5. 2" Corporation with Plug or Saddle and Galvanized Pipe | W-07                    |
| 6. Valves   | W-08                    |
| 7. Fire Hydrants  | W-09, W-10, W-11 & W-12 |
| 8. Hydrant Leads  | W-13                    |
| 9. Water Main Offset                                      | W-14 & W-15             |
| 10. Connection to Existing Water Mains                    | W-16                    |
| 11. Abandon/Remove Water Main and Appurtenances           | W-17                    |
- B. Unit Prices include:
1. Defined work for each Unit Price Item which will provide a functionally complete Project when combined with all unit price items. If there are specific work items which the Contractor believes are not identified in any Unit Price Item, but is required to provide a functionally complete Project, then the identified specific work items shall be included in the appropriate Unit Price Item.
  2. The method of measurement for payment.
  3. The price per unit for payment.

1.2 GENERAL WORK ITEMS

- A. Include with the appropriate Unit Price Item the following work items which are common to the Unit Price Items for water systems.
- B. If there is a specific Unit Price Item for any of the following items, then the work item shall be included with that specific unit price item.
1. Traffic Control.
  2. Sawcutting asphalt and/or concrete.
  3. Removal, hauling and disposal of surface materials including road pavement, curb and gutter, sidewalk, driveways and other pavement surfaces in the trench area and as shown on the drawings.
  4. Dewatering.
  5. Excavation.

6. Open Trench installation method (unless bid item specifies other method).
7. Pipe Bedding.
8. Backfilling and compacting native obtained from the excavation.
9. Supplying, hauling, backfilling and compacting granular material.
10. Loading, hauling and disposing of surplus excavated material.
11. Landscaping – turf establishment surface restoration and trees and bushes damaged during construction.
12. Maintenance, protection, replacement and/or repair of facilities not designated for alteration on the Site beyond the limits identified.
13. Site access requirements including temporary aggregate material as required for local traffic access.
14. Bulkhead and abandoned existing water main with flowable fill as shown on Drawings.
15. If crossing or undermining of existing public or private utility, then include:
  - a. Maintaining the utility in service.
  - b. Replacing of existing utilities, if damaged.
  - c. Providing support and bedding material.
16. Dust control.
17. Remove and replace existing mailboxes and traffic signs.
18. Restroom facilities.
19. Easement and right-of-way requirements.
20. Construction staking and other survey work not provided by the Engineer.
21. Regulatory requirements.
22. Preconstruction videotaping and video equipment.
23. Quality assurance and quality control testing and inspections.
24. Shop drawings and other submittals.

**1.3 WATER MAINS (GRANULAR BACKFILL)**

- A. The unit price for Water Main (Granular Backfill) work includes:
  1. General Work Items of Article 1.2.
  2. Water pipe and fittings of material stated in the Unit Price Bid Schedule and installed using the open trench method and/or directional drilling.
  3. Ductile or cast iron fittings.
  4. Tracer wire.
  5. Polyethylene encasement of ductile iron or cast iron pipe and fittings.
  6. Blocking and joint restraints.
  7. Disinfection of pipelines.
- B. Measurement of payment will be the actual horizontal length along the centerline of the installed water main with no deductions for fittings and valves.
- C. The unit of measurement for payment is linear feet.

**1.4 WATER MAINS (NATURAL BACKFILL)**

- A. The unit price for Water Main (Natural Backfill) work includes:
  - 1. General Work Items of Article 1.2.
  - 2. Water pipe and fittings of material stated in the Unit Price Bid Schedule and installed using the open trench method and/or directional drilling.
  - 3. Ductile or cast iron fittings.
  - 4. Tracer wire.
  - 5. Polyethylene encasement of ductile iron or cast iron pipe and fittings.
  - 6. Blocking and joint restraint.
  - 7. Disinfection of pipelines.
- B. Measurement of payment will be the actual horizontal length along the centerline of the installed water main with no deductions for fittings and valves.
- C. The unit of measurement for payment is linear feet.

**1.5 WATER SERVICES**

- A. The unit price for Water Services work includes:
  - 1. General Work Items of Article 1.2.
  - 2. Pipe and fittings of material stated in the Unit Price Bid Schedule.
  - 3. Tracer wire.
  - 4. Disinfection of pipelines.
  - 5. Install an 8' - 4"x4" board at the end of the lateral.
- B. Measurement of payment will be the actual horizontal length along the centerline of the installed water service with no deductions for fittings and curb stops.
- C. The unit of measurement for payment is linear feet.

**1.6 CORPORATION AND CURB STOPS**

- A. The unit price for Corporation and Curb Stops work includes:
  - 1. General Work Items of Article 1.2.
  - 2. Supply curb stops and curb boxes.
  - 3. Connection to existing water service (where required).
  - 4. Installation of curb stops and curb boxes.
  - 5. Tracer wire.
- B. Measurement for payment will be the actual number installed.
- C. The unit of measurement for payment is each.

**1.7 2-INCH CORPORATION WITH PLUG OR SADDLE AND GALVANIZED PIPE**

- A. The unit price for 2-Inch Corporation with Plug or Saddle and Galvanized Pipe work includes:
  - 1. General Work Items of Article 1.2.
  - 2. Provide and install 2-inch corporation with plug or saddle (where required) with 2-inch galvanized pipe.
  - 3. Remove 2-inch corporation with plug/saddle and repair water main.
- B. Measurement for payment will be the actual number installed.
- C. The unit of measurement for payment is each.

**1.8 VALVES**

- A. The unit price for Valves work includes:
  - 1. General Work Items of Article 1.2.
  - 2. Valve.
  - 3. Valve box.
  - 4. Polyethylene encasement.
  - 5. Stem.
  - 6. Bedding material.
- B. Measurement for payment will be the actual number installed.
- C. The unit of measurement for payment is each.

**1.9 FIRE HYDRANTS**

- A. The unit price for Fire Hydrants work includes:
  - 1. General Work Items of Article 1.2.
  - 2. Fire hydrant complete of the specified bury depth.
  - 3. Blocking and joint restraints.
  - 4. Hydrant wrenches.
  - 5. Hydrant markers.
  - 6. Polyethylene encasement.
  - 7. Drainage pit.
  - 8. Disinfection of hydrant.
  - 9. Tracer wire.
  - 10. Tracer wire access box.
- B. Measurement for payment will be the actual number installed.
- C. The unit of measurement for payment is each.

**1.10 HYDRANTS LEADS**

- A. The unit price for Hydrants Leads work includes:
  - 1. General Work Items of Article 1.2.
  - 2. Pipe and fittings of material stated in the Unit Price Bid Schedule.
  - 3. Blocking and joint restraints.
  - 4. Tracer wire.
  - 5. Disinfection of pipeline.
  
- B. Measurement for payment will be the actual horizontal length along the centerline of the installed from the centerline of the water main to the centerline of the hydrant with no deductions for fittings and valves.
  
- C. The unit of measurement for payment is linear feet.

**1.11 WATER MAIN OFFSET**

- A. The unit price for Water Main Offset work includes:
  - 1. General Work Items of Article 1.2.
  - 2. Ductile iron fittings and PVC pipe.
  - 3. Tracer wire.
  - 4. Polyethylene encasement of ductile iron pipe and fittings.
  - 5. Blocking and joint restraints.
  
- B. Measurement for payment will be the actual number installed.
  
- C. The unit of measurement for payment is each.

**1.12 CONNECTIONS TO EXISTING WATER MAINS**

- A. The unit price for Connection to Existing Water Mains work includes:
  - 1. General Work Items of Article 1.2.
  - 2. Locating existing water main.
  - 3. Connection to the end of existing pipe.
    - a. Remove existing plug.
    - b. Direct connection to end of existing pipe.
    - c. Transition fittings, if required.
  
- B. Measurement for payment will be the actual number installed.
  
- C. The unit of measurement for payment is each.

1.13 ABANDON / REMOVE WATER MAIN AND APPURTENANCES

- A. The unit price for Abandon/Remove Water Main and Appurtenances work includes:
1. General Work Items of Article 1.2.
  2. Excavating
  3. Install bulkheads and abandon water line.
  4. Removing existing water main where in conflict with other utilities.
  5. Providing and placing flowable fill.
  6. Backfilling and compacting.
  7. Removal and disposal of appurtenances as shown on the Drawings.
- B. Measurement for payment will not be made. This includes all of the project area.
- C. The unit of measurement for payment is lump sum.

END OF SECTION

SECTION 01 22 04

MEASUREMENT AND PAYMENT STREET AND DRAINAGE CONSTRUCTION

PART 1 – GENERAL

1.1 SUMMARY

- A. Section includes:
- |   | <u>Bid Item No.</u>  |
|---|----------------------|
| 1. Topsoil and Unclassified Excavation                | SD-01                |
| 2. Remove Pavement                                    | SD-02                |
| 3. Ditching   | SD-03                |
| 4. Mill Asphaltic Concrete Pavement                   | SD-04                |
| 5. Pulverize Asphaltic Concrete Pavement              | SD-05                |
| 6. Crushed Aggregate Base and Surface Course          | SD-06 & SD-07        |
| 7. Asphaltic Concrete Pavement                        | SD-08, SD-09 & SD-10 |
| 8. Asphalt Concrete Pavement Patch                    | SD-11                |
| 9. Portland Cement Concrete Curb and Gutter           | SD-12, SD-13 & SD-14 |
| 10. Portland Cement Concrete Driveway and Sidewalk    | SD-15, SD-16 & SD-17 |
| 11. Deformed Reinforcement Bars                       | SD-18                |
| 12. Drilling Tie Bars and Dowel Bars                  | SD-19                |
| 13. Detectable Warning Field Natural                  | SD-20                |
| 14. Landscaping – Topsoil, Seed, Fertilize, and Mulch | SD-21                |
- B. Unit Prices include:
1. Defined work for each Unit Price Item which will provide a functionally complete Project when combined with all unit price items. If there are specific work items which the Contractor believes are not identified in any Unit Price Item, but is required to provide a functionally complete Project, then the identified specific work items shall be included in the appropriate Unit Price Item.
  2. The method of measurement for payment.
  3. The price per unit for payment.

1.2 GENERAL WORK ITEMS

- A. Include with the appropriate Unit Price Item the following work items which are common to the Unit Price Items for street and drainage systems.
- B. If there is a specific Unit Price Item for any of the following items, then the work item shall be included with that specific unit price item.
1. Traffic Control.
  2. Sawcutting asphalt and/or concrete.

3. Removal, hauling and disposal of surface materials including road pavement, curb and gutter, sidewalk, driveways and other pavement surfaces in the trench area and as shown on the drawings.
4. Maintenance, protection, replacement and/or repair of facilities not designated for alteration on the Site.
5. Site access requirements including temporary aggregate material as required for local traffic access.
6. Dust control.
7. Remove and replace existing mailboxes and traffic signs.
8. Restroom facilities.
9. Construction staking and other survey work not provided by the Engineer.
10. Regulatory requirements.
11. Quality assurance and quality control testing and inspections.
12. Final casting and valve box adjustment.
13. Shop drawings and other submittals.

### 1.3 TOPSOIL AND UNCLASSIFIED EXCAVATION

- A. The unit price for Topsoil and Unclassified Excavation work includes:
  1. General Work Items of Article 1.2.
  2. Removal of topsoil to depth available.
  3. Hauling and stockpiling topsoil.
  4. Excavation to subgrades shown on the Drawings.
  5. Hauling of unclassified material.
  6. Placing unclassified material in fill areas to subgrades shown on the Drawings and the subgrade required for placement of topsoil.
  7. Compaction of subgrade and fill areas.
  8. Test rolling subgrade.
  9. Excavation of undercut areas for placing topsoil.
  10. Respreading topsoil to final grades shown on the Drawings.
  11. Disposal of surplus topsoil, unclassified material and unsuitable material.
  12. Preparation of disposal site and transportation of material over an Engineer approved haul route from the site including all loading and dumping of material.
  13. Finish grading.
- B. Measurement of payment will not be made unless there is a change in project scope. The estimated quantity represents the computed volume by comparing the triangulated surfaces and will be the basis for payment.
- C. The unit of measurement for payment is cubic yards.

**1.4 REMOVE PAVEMENT**

- A. The unit price for Remove Pavement work includes:
  - 1. General Work Items of Article 1.2.
  - 2. Sawcutting.
  - 3. Asphaltic concrete pavement removal.
  - 4. Curb and gutter removal.
  - 5. Grading and compacting existing base course.
  
- B. Measurement of payment will be the length and width of the pavement removal.
  - 1. This item only applies to the pavement removal on the east end of Reid Street at Main Avenue Annex.
  
- C. The unit of measurement for payment is square yards.

**1.5 DITCHING**

- A. The unit price for Ditching work includes:
  - 1. General work items of Article 1.2.
  - 2. Removal of topsoil to depth available.
  - 3. Hauling and stockpiling topsoil.
  - 4. Excavation to subgrades shown on the drawings.
  - 5. Hauling of unclassified material.
  - 6. Placing unclassified material in fill areas to subgrades shown on the drawings and the subgrade required for placement of rip rap.
  - 7. Compaction of subgrade and fill areas.
  - 8. Excavation of undercut areas for placing rip rap.
  - 9. Disposal of surplus topsoil, unclassified material and unsuitable material.
  - 10. Preparation of disposal site and transportation of material over an engineer approved haul route from the site including all loading and dumping of materials.
  - 11. Finish grading.
  
- B. Measurement of payment will be the length and width of the area to be ditched.
  
- C. The unit of measurement for payment is square yards.

**1.6 MILL ASPHALTIC CONCRETE PAVEMENT**

- A. The unit price for Mill Asphaltic Concrete Pavement work includes:
  - 1. General Work Items of Article 1.2.
  - 2. Milling to length, width and depth as shown on Drawings or specified elsewhere.
  - 3. Hauling and disposing of millings.
  - 4. Cleaning of area milled.

- B. Measurement for payment will be the average horizontal length and width of roadway.
- C. The unit of measurement for payment is square yards.

**1.7 PULVERIZE ASPHALTIC CONCRETE PAVEMENT**

- A. The unit price for Pulverize Asphaltic Concrete Pavement work includes:
  - 1. General Work Items of Article 1.2.
  - 2. Pulverizing asphaltic concrete pavement with crushed aggregate base course to a depth of 8-inches.
  - 3. Compacting and fine grading of pulverized material.
  - 4. Removal of excess material to established grade elevations.
- B. Measurement for payment will be the average horizontal length and width of roadway.
- C. The unit of measurement for payment is square yards.

**1.8 CRUSHED AGGREGATE BASE AND SURFACE COURSE**

- A. The unit price for Crushed Aggregate Base and Surface Course work includes:
  - 1. General Work Items of Article 1.2.
  - 2. Aggregate material.
  - 3. Preparation of foundation.
  - 4. Placing and compacting to thickness and width shown on the Drawings or specified elsewhere.
  - 5. Maintenance until surface pavement is constructed.
  - 6. Preparation of crushed aggregate base for paving.
  - 7. Adjustment of manholes and valve boxes to proposed finish road grade.
- B. Measurement of payment will be:
  - 1. Width:
    - a. The width will not be greater than the maximum trench width at the surface which is greater of the pipe outside diameter plus twenty-four (24) inches or the distance from the surface to the top of the pipe embedment; or
    - b. If the surface removal and the replacement limits are shown on the drawings outside the maximum trench width, then the actual average width of the area will be measured.
  - 2. The depth will be the actual measured depth not to exceed the depth shown on the drawings or specified elsewhere.
  - 3. The length will be the actual length measured longitudinally along the installed facility.
- C. The unit of measurement for payment is square yards.

**1.9 ASPHALTIC CONCRETE PAVEMENT**

- A. The unit price for Asphaltic Concrete Pavement work includes:
  - 1. General Work Items of Article 1.2.
  - 2. Asphaltic concrete mixture, tack coat and other required materials
  - 3. Surface preparation.
  - 4. Provide tack coat on base material.
  - 5. Saw cutting and/or mill adjacent and abutting pavement surfaces.
  - 6. Asphaltic concrete placement and compaction to thickness and width shown on the drawings or specified elsewhere.
  - 7. Tack coat between asphaltic concrete courses and abutting pavements.
  
- B. Measurement for payment will be the actual amount of material required and incorporated in the work verified by submitting to the Engineer delivery tickets provided with each load showing the weight measured on a certified scale, type of material, the date delivered and the project name.
  
- C. The Unit Price shall be adjusted for deficiencies for less than minimum density represented by the average lot density of five nuclear density tests of 750 tons of asphaltic concrete placed as shown in the following table:

Density Deficiency-Percent of Unit Price for Payment	
%Lot Density Below Specified Minimum	WisDOT Mixes
From 0.5-1.0 inclusive	98%
From 1.1-1.5 inclusive	95%
From 1.6-2.0 inclusive	91%
From 2.1-2.5 inclusive	85%
From 2.6-3.0 inclusive	70%
More than 3.0	0%

- D. The unit of measurement for payment is tons.

**1.10 ASPHALTIC CONCRETE PAVEMENT PATCH**

- A. The unit price for Asphaltic Concrete Pavement Patch work includes:
  - 1. General Work Items of Article 1.2.
  - 2. Sawcutting.
  - 3. Removal of asphalt.
  - 4. Asphaltic concrete mixture, tack coat and other required materials.
  - 5. Surface preparation.
  - 6. Grading subgrade.
  - 7. Asphaltic concrete placement and compaction to thickness matching surrounding pavements.

8. Tack coat between asphaltic courses and abutting pavement.

B. Measurement for payment will be the average horizontal length and width of roadway.

C. The unit of measurement for payment is square yards.

#### 1.11 PORTLAND CEMENT CONCRETE CURB AND GUTTER

A. The unit price for Portland Cement Concrete Curb and Gutter work includes:

1. General Work Items of Article 1.2.
2. Providing Portland cement concrete mixture of size shown in the drawings or specified elsewhere.
3. Providing expansion joints.
4. Providing curing.
5. Existing curb and gutter removal.
6. Subgrade preparation.
7. Provide crushed aggregate base.
8. Fine grading of subgrade.
9. Providing contraction joints.
10. Driveway entrances and handicap ramp entrances.
11. Adjustment of catch basin/inlets.
12. Finishing.
13. Protection.
14. Restoration behind the curb.

B. Measurement for payment will be along the flow line of the gutter and through inlets/catch basins.

C. The unit of measurement for payment is linear feet.

#### 1.12 PORTLAND CEMENT CONCRETE DRIVEWAY AND SIDEWALK

A. The unit price for Portland Cement Concrete Sidewalk and Driveway work includes:

1. General Work Items of Article 1.2.
2. Providing Portland cement concrete mixture of thickness shown in the drawings or specified elsewhere.
3. Providing reinforcement.
4. Providing expansion joint.
5. Providing curing.
6. Existing pavement removal.
7. Subgrade preparation.
8. Providing contraction joints.
9. Handicap ramps.
10. Sidewalk steps.

11. Saw cutting adjacent surfaces.
12. Finishing.
13. Protection.
14. Restoration.

- B. Measurement for payment will be the average horizontal length and width of the concrete placed.
- C. The unit of measurement for payment is square yards.

#### 1.13 DEFORMED REINFORCEMENT BARS

- A. The unit price for Deformed Reinforcement Bars work includes:
1. General Work Items of Article 1.2.
  2. Supply and install two - #4 deformed reinforcement bars over all trenches that fall under any portion of the concrete curb and gutter, sidewalk, and driveway being constructed.
- B. Measurement for payment will be the horizontal length of each bar installed.
1. This item applies to concrete curb and gutter, sidewalk, and driveway.
  2. This item does not apply to concrete pavement and patches.
- C. The unit of measurement for payment is linear feet.

#### 1.14 DRILLING TIE BARS

- A. The unit price for Drilling Tie Bars work includes:
1. General Work Items of Article 1.2.
  2. Providing and installing tie bars, including coating.
  3. For drilling holes in concrete not placed under the contract.
  4. For epoxying or driving.
- B. Measurement for payment will be the actual number of bars installed.
1. This item applies to concrete curb and gutter, sidewalk, and driveway.
  2. This item does not apply to concrete pavement and patches.
- C. The unit of measurement for payment is each.

#### 1.15 DETECTABLE WARNING FIELD NATURAL

- A. The unit price for Detectable Warning Field Natural work includes:
1. General Work Items of Article 1.2.
  2. Providing and installing Detectable Warning Field per ADA requirements.
  3. Each detectable warning field shall be two (2) feet by four (4) feet.

- B. Measurement for payment will be the actual number of detectable warning field installed.
- C. The unit of measurement for payment is each.

1.16 LANDSCAPING- TOPSOIL, SEED, FERTILIZE AND MULCH

- A. The unit price for Landscaping- Topsoil, Seed, Fertilize, and Mulch work includes:
  - 1. General Work Items of Article 1.2.
  - 2. Provide 4" topsoil or salvaged topsoil.
  - 3. Provide seed.
  - 4. Provide fertilizer.
  - 5. Provide mulch.
  - 6. Provide maintenance.
- B. Measurement for payment will be the width and length not greater than the road right-of-way, not greater than the easement and not greater than fifteen (15) feet beyond the top of either side of ditches outside the right-of-way.
- C. The unit of measurement for payment is square yard.

END OF SECTION

SECTION 01 22 05

MEASUREMENT AND PAYMENT SPECIAL CONSTRUCTION

PART 1 – GENERAL

1.1 SUMMARY

- |   |                      |
|---|----------------------|
| A. Section includes:                              | <u>Bid Item No.</u>  |
| 1. Pipe Foundation Stabilization                  | SC-01                |
| 2. Inlet Protection Erosion Control               | SC-02 & SC-03        |
| 3. Rip Rap Erosion Control                        | SC-04 & SC-05        |
| 4. Adjusting Existing Structure Frame and Casting | SC-06, SC-07 & SC-08 |

- B. Unit Prices include:
1. Defined work for each Unit Price Item which will provide a functionally complete Project when combined with all unit price items. If there are specific work items which the Contractor believes are not identified in any Unit Price Item, but is required to provide a functionally complete Project, then the identified specific work items shall be included in the appropriate Unit Price Item.
  2. The method of measurement for payment.
  3. The price per unit for payment.

1.2 GENERAL WORK ITEMS

- A. Include with the appropriate Unit Price Item the following work items which are common to the Unit Price Items for special construction.
- B. If there is a specific Unit Price Item for any of the following items, then the work item shall be included with that specific unit price item.
1. Traffic Control.
  2. Loading, hauling and disposing of surplus material.
  3. Maintenance, protection, replacement and/or repair of facilities not designated for alteration on the Site beyond the limits identified.
  4. Dust control.
  5. Restroom facilities.
  6. Construction staking and other survey work not provided by the Engineer.
  7. Regulatory requirements.
  8. Quality assurance and quality control testing and inspections.
  9. Shop drawings and other submittals.

**1.3 PIPE FOUNDATION STABILIZATION**

- A. The unit price for Pipe Foundation Stabilization work includes:
  - 1. General Work Items of Article 1.2.
  - 2. Excavation below the limits of the pipe bedding with the bottom of the excavation wider than the top with 1:1 side slopes.
  - 3. Dewatering.
  - 4. Soil Class A-7 or A-8 aggregate material.
  - 5. Loading, hauling and disposing of surplus excavated material.
  
- B. Measurement of payment will be the volume calculated based on:
  - 1. The actual depth from four (4) inches below the bottom of pipe to the bottom of the aggregate material placed.
  - 2. The bottom width is the actual width not to exceed the pipe outside diameter plus twenty-four (24) inches plus 1:1 side slopes.
  - 3. The top width is the pipe outside diameter plus twenty-four (24) inches.
  
- C. The unit of measurement for payment is cubic yards.

**1.4 INLET PROTECTION EROSION CONTROL**

- A. The unit price for Inlet Protection Erosion Control work includes:
  - 1. General Work Items of Article 1.2.
  - 2. Provide geotextile and wood materials for type shown on the Drawings.
  - 3. Placing inlet protection system.
  - 4. Inspection and maintenance of the installed inlet protection.
  - 5. Removal of the inlet protection.
  - 6. Cleaning debris buildup around inlet.
  
- B. Measurement for payment will be actual number of inlet protection erosion control installed.
  
- C. The unit of measurement for payment is each.

**1.5 RIP RAP EROSION CONTROL**

- A. The unit price for Rip Rap Erosion Control work includes:
  - 1. General Work Items of Article 1.2.
  - 2. Provide rip rap material and geotextile fabric.
  - 3. Provide grouting material (where applicable).
  - 4. Excavate and place rip rap material.
  
- B. Measurement for payment will be the actual area installed.
  
- C. The unit of measurement for payment is square yards.

1.6 ADJUST EXISTING STRUCTURE FRAME CASTING

- A. The unit price for Adjusting Existing Structure Frame Casting work includes:
1. General Work Items of Article 1.2.
  2. Providing new casting frame and lid at locations indicated on the plans.
  3. Removal of the casting and existing adjusting rings from the structure as required.
  4. Providing concrete adjusting rings and a 2-inch rubber riser ring from the WisDOT approved product list.
  5. Bituminous plastic cement sealing the exterior of the adjusting rings and casting.
  6. The ring will be secured to the precast section with a 3 ½ inch wide Kent Seal or equal.
  7. Above the concrete ring attach ¼ inch thru 3-inch-thick ring using two <sup>5</sup>/<sub>16</sub> inch bead above and below the ring of sealant type as recommended by the rubber manufacturer.
  8. Initial and final adjustment.
  9. Backfilling and compacting.
- B. Measurement for payment will be the actual number of structure frame casting adjusted.
- C. The unit of measurement for payment is each.

END OF SECTION

**SECTION 01 29 00**

**PAYMENT PROCEDURES**

**PART 1 – GENERAL**

**1.1 SUMMARY**

**A. This section includes:**

1. Administrative and procedural requirements necessary to prepare and process Applications for Payment.

**1.2 SCHEDULE OF VALUES**

- A. Unit Price work will be the Schedule of Values used as the basis for reviewing Applications for Payment.**

**1.3 APPLICATIONS FOR PAYMENT**

- A. Each Application for Payment shall be consistent with previous applications and payments as recommended by the Engineer and approved by Owner.**

- B. The date for each progress payment should be the 3<sup>rd</sup> Wednesday of each month. The period covered by each Application for Payment starts on the day following the end of the preceding period and ends the 4<sup>th</sup> Friday of the Month.**

- C. Use forms provided by Engineer for Applications for Payment. Sample copy of the Application for Payment and Continuation Sheet is included in Section 00 62 76.**

**D. Application Preparation Procedures**

1. When requested by the Contractor, the Engineer will determine the actual quantities and classifications of Unit Price Work performed.
  - a. Preliminary determinations will be reviewed with the Contractor before completing Application for Payment.
  - b. Engineer will complete the Application for Payment based on Engineer's decision on actual quantities and classifications.
  - c. Engineer will submit three original copies of Application for Payment to Contractor for certification of all three original copies.
  - d. Contractor shall submit signed Application for Payment to Owner for approval within time frame agreed to at the Preconstruction Conference.
2. If payment is requested for materials and equipment not incorporated in the Work, then the following shall be submitted with the Application for Payment:
  - a. Evidence that materials and equipment are suitably stored at the site or at another location agreed to in writing.

- b. A bill of sale, invoice, or other documentation warranting that the materials and equipment are free and clear of all liens.
    - c. Evidence that the materials and equipment are covered by property insurance.
  3. Complete every entry on form. Execute by a person authorized to sign legal documents on behalf of Contractor.
- E. With each Application for Payment, submit waivers of liens from subcontractors and suppliers for the construction period covered by the previous application.
  1. Submit partial waivers on each item for amount requested before deduction for retainage on each item.
  2. When an application shows completion for an item, submit final or full waivers.
  3. Owner reserves the right to designate which entities involved in the Work shall submit waivers.
  4. Submit final Application for Payment with or preceded by final waivers from every entity involved with performance of the Work covered by the application.
  5. Submit waivers of lien on forms executed in a manner acceptable to Owner.
- F. The following administrative actions and submittals shall precede or coincide with submittal of first Application for Payment:
  1. List of subcontractors.
  2. Schedule of Values (For Lump Sum Work).
  3. Contractor's construction schedule.
- G. Submit final Application for Payment with releases and supporting documentation not previously submitted and accepted including, but not limited, to the following:
  1. Evidence of completion of Project closeout requirements.
  2. Insurance certificates for products and completed operations where required and proof that taxes, fees, and similar obligations were paid.
  3. Updated final statement, accounting for final changes to the Contract Sum.
  4. Consent of Surety to Final Payment.
  5. Final lien waivers as evidence that claims have been settled.
  6. Final liquidated damages settlement statement.

**PART 2 – PRODUCTS**

**PART 3 – EXECUTION**

**END OF SECTION**

**SECTION 01 32 33**

**CONSTRUCTION PHOTOGRAPHS**

**PART 1 – GENERAL**

**1.1 SUMMARY**

**A. Section Includes:**

1. Photographs for utility construction sites.

**1.2 SUBMITTALS**

- A. Submit electronic files of each photographic view within seven (7) days of taking photographs.

**1.3 QUALITY ASSURANCE**

- A. Photographs are to be submitted to the Engineer for approval prior to the start of construction.

**PART 2 – PRODUCTS**

**PART 3 – EXECUTION**

**3.1 UTILITY AND STREET CONSTRUCTION SITES**

- A. Prior to start of construction provide sufficient photographs to adequately show the existing facilities and conditions within and adjacent to the construction Site to serve as a guide for final restoration including:
1. Roads including shoulders and/or curb and gutter.
  2. Sidewalks, parking areas, and driveways.
  3. Utility structures.
  4. Landscaping including signs, plantings, walls, fences, trees, shrubbery, etc.
  5. Mailboxes.
  6. Drainage facilities including culverts, inlets, ditches.
  7. Building structures.
- B. During construction provide sufficient photographs (a minimum of one per 100 feet of installed utility) to adequately show construction means, methods, and Site conditions including:
1. Crossings of other utilities.
  2. Exposure of existing structures.
  3. Soil conditions.

**END OF SECTION**

**SECTION 01 33 00**

**SUBMITTALS**

**PART 1 – GENERAL**

**1.1 SUMMARY**

- A. Section includes administrative and procedural requirements for submittals:
  - 1. Progress Schedule.
  - 2. Schedule of Shop Drawings and Sample Submittals.
  - 3. Shop Drawings.
  
- B. Failure to meet Submittal requirements to the satisfaction of the Engineer will constitute unsatisfactory performance of the work in accordance with the Contract Documents, therefore, the Engineer may recommend to the Owner that all or a portion of payments requested during the corresponding pay period be withheld until these requirements are met.

**1.2 SUBMITTAL PROCEDURES**

- A. Coordination: Transmit each submittal sufficiently in advance of performance of related construction activities to avoid delay.
  - 1. Coordinate each submittal with fabrication, purchasing, testing, delivery, other submittals, and related activities that require sequential activity.
  - 2. Coordinate transmittal of different types of submittals for related elements of the work so processing will not be delayed by the need to review submittals concurrently for coordination.
    - a. The Engineer reserves the right to withhold action on a submittal requiring coordination with other submittals until all related submittals are received.
  - 3. To avoid the need to delay installation as a result of the time required to process submittals, allow sufficient time for submittal review, including time for re-submittals.
    - a. Allow two weeks for initial submittal.
    - b. Allow two weeks for reprocessing each submittal.
    - c. No extension of Contract Time will be authorized because of failure to transmit submittals to the Engineer sufficiently in advance of the work to permit processing.
  
- B. Submittal Preparation: Place a permanent label or title block on each submittal for identification. Indicate the name of the entity that prepared each submittal on the label or title block.
  - 1. Assign a reference number to each submittal and re-submittal.
  - 2. Provide a space approximately four (4) by five (5) inches (100 by 125 mm) on the label or beside the title block on Shop Drawings to record the Contractor's review and approval markings and the action taken.
  - 3. Include the following information on the label for processing and recording action taken.

- a. Project name.
  - b. Date.
  - c. Name and address of the Engineer.
  - d. Name and address of the Contractor.
  - e. Name and address of the subcontractor.
  - f. Name and address of the supplier.
  - g. Name of the manufacturer.
  - h. Number and title of appropriate Specification Section.
  - i. Drawing number and detail references, as appropriate.
4. Each submittal shall be stamped by the Contractor indicating that submittal was reviewed for conformance with the Contract Documents. The Engineer will not accept unstamped submittals.
- C. Submittal Transmittal: Package each submittal appropriately for transmittal and handling. Transmit each submittal to the Engineer. The Engineer will not accept submittals received from sources other than the Contractor.
1. On the transmittal, record relevant information and requests for Engineer action. On a form, or separate sheet, record deviations from Contract Document requirements, including variations, limitations, and justifications. Include Contractor's certification that information complies with Contract Document requirements.

### 1.3 CONTRACTOR'S PROGRESS SCHEDULE

- A. Prepare and submit to the Engineer within 10 (ten) days after the Effective Date of the Agreement, four copies of a preliminary progress schedule of the work activities from Notice to Proceed until Substantial Completion.
1. Provide sufficient detail of the work activities comprising the schedule to assure adequate planning and execution of the work, such that in the judgment of the Engineer, it provides an appropriate basis for monitoring and evaluation of the progress of the work. A work activity is defined as an activity which requires substantial time and resources (manpower, equipment, and/or material) to complete and must be performed before the contract is considered complete.
  2. The schedule shall indicate the sequence of work activities. Identify each activity with a description, start date, completion date and duration. Include, but do not limit to the following items, as appropriate to this contract:
    - a. Shop drawing review by the Engineer.
    - b. Excavation and grading.
    - c. Asphalt and concrete placement sequence.
    - d. Restoration.
    - e. Construction of various segments of utilities.
    - f. Subcontractor's items of work.
    - g. Allowance for inclement weather.
    - h. Contract interfaces, date of Substantial Completion.
    - i. Interfacing and sequencing with existing facilities and utilities.

- j. Sequencing of major construction activities.
  - k. Milestones and completion dates.
- B. Distribution: Following response to the initial submittal, print and distribute copies of the revised construction schedule to the Engineer, Subcontractors, and other parties required to comply with scheduled dates. When revisions are made, distribute to the same parties. Delete parties from distribution when they have completed their assigned portion of the work and are no longer involved in construction activities.
- C. Schedule Updating: Revise the schedule after each meeting, event, or activity where revisions have been recognized or made. Issue the updated schedule concurrently with the report of each meeting.
- D. Punch List: Prepare and submit to the Engineer within ten (10) days after substantial completion a detailed progress schedule for outstanding work and punch list items.

#### 1.4 SCHEDULE OF SHOP DRAWINGS AND SAMPLE SUBMITTALS

- A. Submit electronic or one (1) hard copy of preliminary submittal schedule in accordance with the General Conditions of the Contract and as follows:
- 1. Coordinate submittal schedule with the subcontractors, Schedule of Values, and of products as well as the Contractor's Progress Schedule.
  - 2. Prepare the schedule in chronological order. Provide the following information:
    - a. Scheduled date for the first submittal.
    - b. Related Section number.
    - c. Submittal category (Shop Drawings, Product Data, or Samples).
    - d. Name of the subcontractor.
    - e. Description of the part of the work covered.
    - f. Scheduled date for the Engineer's final release or approval.
- B. Distribution: Following response to the initial submittal, print and distribute copies of the revised construction schedule to the Engineer, Subcontractors, and other parties required to comply with scheduled dates. Post copies in the field office. When revisions are made, distribute to the same parties. Delete parties from distribution when they have completed their assigned portion of the work and are no longer involved in construction activities.
- C. Schedule Updating: Revise the schedule after each meeting or activity where revisions have been recognized or made. Issue the updated schedule concurrently with the report of each meeting.

#### 1.5 SHOP DRAWINGS

- A. Submit newly prepared information drawn accurately to scale. Highlight, encircle, or otherwise indicate deviations from the Contract Documents. Do not reproduce Contract Documents or

copy standard information as the basis of Shop Drawings. Standard information prepared without specific reference to the Project is not a Shop Drawing.

- B. Collect product data into a single submittal for each element of construction of system. Product data includes printed information, such as manufacturer's installation instructions, catalog cuts, standard color charts, roughing-in diagrams and templates, standard wiring diagrams, and performance curves.
  - 1. Mark each copy to show actual product to be provided. Where printed Product Data includes information on several products that are not required, mark copies to indicate the applicable information. Include the following information:
    - a. Manufacturer's printed recommendations.
    - b. Compliance with trade association standards.
    - c. Compliance with recognized testing agency standards.
    - d. Application of testing agency labels and seals.
    - e. Notation of dimensions verified by field measurement.
    - f. Notation of coordination requirements.
- C. Do not use shop drawings without an appropriate final stamp indicating action taken.
- D. Submittals: Submit electronic or one (1) hard copy of each required submittal. The Engineer will scan and return the submittal to the Contractor marked with action taken and corrections or modifications required.
- E. Distribution: Furnish copies of reviewed submittal to installers, subcontractors, suppliers, manufacturers, fabricators, and others required for performance of construction activities. Show distribution on transmittal forms. Maintain one copy at the project site for reference.
  - 1. Do not proceed with installation until a copy of the Shop drawing is in the Installer's possession.
  - 2. Do not permit use of unmarked copies of the Shop Drawing in connection with construction.

## 1.6 ENGINEER'S ACTION

- A. Except for submittals for the record or information, where action and return is required, the Engineer will review each submittal, mark to indicate action taken, and return promptly. The Engineer will stamp each submittal with a uniform action stamp. The Engineer will mark the stamp appropriately to indicate the action taken, as follows:
  - 1. "No Exceptions Taken": The work covered by the submittal may proceed provided it complies with notations or corrections on the submittal and requirements of the Contract Documents.
  - 2. "Make Corrections Noted": The work covered by the submittal may proceed provided it complies with notations or corrections on the submittal and requirements of the Contract Documents.

3. "Amend and Resubmit": Do not proceed with work covered by the submittal. Resubmit without delay. Do not use, or allow others to use, submittals marked "Amend and Resubmit" at the Project Site or elsewhere where work is in progress.
4. "Rejected – See Remarks": Do not proceed with work covered by the submittal. Resubmit without delay. Do not use, or allow others to use, submittals marked "Rejected and Resubmit" at the Project Site or elsewhere where work is in progress.

B. Unsolicited Submittals: The Engineer will return unsolicited submittals to the sender without action.

PART 2 – PRODUCTS

PART 3 – EXECUTION

END OF SECTION

**SECTION 01 41 00**

**REGULATORY REQUIREMENTS**

**PART 1 – GENERAL**

**1.1 SUMMARY**

- A. Section Includes:
  - 1. Underground Utilities.
  - 2. Property Monuments.
  - 3. Traffic Control.
  - 4. Permits for Project.

**1.2 UNDERGROUND UTILITIES**

- A. Under the provisions of Wisconsin Statutes, Section 182.0175, all contractors, subcontractors, and any firm or individual intending to do work on this Contract shall contact all utility firms in the affected area of construction a minimum of three (3) working days prior to beginning construction so that affected utilities will be located and marked.

**1.3 PROPERTY MONUMENTS**

- A. Protect iron pipe monuments from movement.
- B. The cost of replacement of any monuments moved or destroyed during construction shall be the Contractor's responsibility.
- C. Perpetuation of destroyed or moved monuments shall be performed in accordance with state statutes by a registered land surveyor.

**1.4 TRAFFIC CONTROL**

- A. Provide traffic control facilities including barricades, signs, lights, warning devices, pavement markings, flaggers, etc.
- B. Construct and use traffic control facilities in accordance with the U.S. D. O. T. Federal Highway Administration's Manual on Uniform Traffic Control Devices for Streets and Highways.
- C. Maintain traffic control devices as required to properly safeguard the public travel through final completion, including during periods of suspension of work.

1.5 PERMITS FOR PROJECT

A. The following permits are being obtained by the Owner:

1. Wisconsin Department of Natural Resources Water System Plan Review
2. Wisconsin Department of Natural Resources Storm Water Notice of Intent (NOI)

B. Any costs associated with violations pertaining to the NOI permit will be the responsibility of the Contractor.

PART 2 – PRODUCTS (Not used)

PART 3 – EXECUTION (Not used)

END OF SECTION

**SECTION 01 71 23**

**FIELD ENGINEERING**

**PART 1 – GENERAL**

**1.1 SUMMARY**

- A. Section Includes:
  - 1. Engineering Surveys Provided by the Engineer.
  - 2. Engineering Surveys Provided by the Contractor.

**1.2 SUBMITTALS**

- A. None

**PART 2 – PRODUCTS (Not Used)**

**PART 3 – EXECUTION**

**3.1 PREPARATION**

- A. Investigate and verify the existence and location of site improvements, utilities, and other existing facilities.
- B. Before construction, verify the location of invert elevations at points of connection of sanitary sewer, storm sewer, water piping and underground electrical services.
- C. Furnish information to the Engineer and the appropriate utility regarding conflicts that are necessary to adjust, move, or relocate existing utility structures, utility poles, lines, services, or other utility appurtenances located in or affected by construction.
- D. Provide the Engineer two (2) working days advance notification when ready for engineering surveys for construction to be provided by the Engineer.

**3.2 ENGINEERING SURVEYS TO BE PROVIDE BY THE ENGINEER**

- A. General
  - 1. Establish benchmarks for construction as shown on the drawings.
  - 2. Establish control points as shown on the drawings.
- B. Gravity Sewer Systems and Water Distribution Systems
  - 1. Provide construction reference stakes set for pipe construction location at critical changes in horizontal and vertical alignment.

2. Provide construction stakes for location of pipe at connections.

C. New Road Construction

1. Provide construction slope intercept stakes for horizontal and vertical alignment on each side of the road base on each cross section in the cross section sheets for requests received at least seventy-two (72) hours before the related work begins.
2. Provide construction reference stakes for subgrade at a minimum of fifty (50) foot intervals and maximum of one-hundred (100) foot intervals on tangents. Provide construction reference stakes for subgrade at twenty-five (25) foot intervals within vertical and horizontal curves. Provide a reference line stake at each location.
3. Provide construction reference stakes for top of crushed aggregate at a minimum of fifty (50) foot intervals and maximum of one-hundred (100) foot intervals on tangents. Provide construction reference stakes for top of crushed aggregate at twenty-five (25) foot intervals within vertical and horizontal curves. Provide a reference or centerline stake.

**3.3 ENGINEERING SURVEYS TO BE PROVIDED BY THE CONTRACTOR**

A. General

1. Locate, preserve and protect established construction reference stakes, benchmarks and control points.
2. Locate, preserve and protect property corners and section corner monuments. If moved or destroyed due to Contractor negligence, then replace in accordance with state requirements; some of which are referenced in the "Regulatory Requirements".
3. Provide additional construction staking as necessary to complete construction based on the construction reference stakes provided by the Engineer and the Drawings.
4. Before beginning with necessary construction staking, verify the information shown on the Drawings, in relation to the established construction reference stakes, bench marks, control points and property corners. Notify the Engineer of any discrepancies.
5. Remove construction reference stakes when directed by the Engineer.

B. Gravity Sewer Systems and Water Distribution Systems

1. Provide any intermediate construction reference points as required to verify installation at the line and grade established and locate appurtenant structures.
2. Check the line and grade with construction reference stakes at each pipe length.

C. New Road Construction

1. Provide additional construction reference stakes necessary to establish location and grade in accordance with the plans.

END OF SECTION

**SECTION 32 01 16.10**

**PULVERIZE ASPHALT PAVEMENTS**

PART 1 – GENERAL

1.1 SUMMARY

- A. Section Includes:
1. Cold Recycling of asphaltic pavements

PART 2 – PRODUCTS

2.1 EQUIPMENT

- A. Crushing Equipment
1. Crushing equipment may be an in-place crusher or a central crusher.
  2. In-place crusher:
    - a. Provide a self-propelled machine designed and built for reduction in size of old pavement material in-place.
    - b. Provide a rotary reduction machine, having positive depth and control adjustments in increments of ½ inch and capable of reducing material to at least 6 inches thick.
    - c. Provide a totally enclosed drum to prevent discharge of any loosened material on adjacent areas.
  3. Pulverize the full depth of the existing asphaltic pavement until 97 percent or more will pass the 2-inch sieve. Also pulverize the existing base to the depth the plans show and mix with the pulverized asphaltic pavement.
- B. Compaction
1. Provide a vibratory roller capable of exerting a minimum total force of 450 lbs. per linear inch of roller drum.

PART 3 – EXECUTION

3.1 PREPARATION

- A. Clean the pavement surfaces of excessive dirt, clay or other foreign material immediately prior to milling the pavement.
- B. Saw cut pavement at project ends and side roads to provide proper butt joint.

3.2 APPLICATION

- A. Work includes scarifying, pulverizing, crushing, redistributing, blending, shaping, rolling and

compacting of recrushed aggregate material to proper elevation and slope.

- B. Protect from damage manholes, valve boxes, and any other items in the roadway.

END OF SECTION

**SECTION 33 00 02.1**

**FUSIBLE POLYVINYL CHLORIDE (PVC) PIPE**

1.1 SUMMARY

- A. Section Includes:
  - 1. PVC pipe for water main
- B. The products described are not installed under this Section.
- C. This specification section is a supplemental to the City of De Pere Standard Specifications and Section 33 00 02 Polyvinyl Pipe (PVC) Pipe and Fittings.
- D. This material specification covers the requirements of fusible polyvinylchloride pipe, including Fusible C-900 and Fusible C-905.

1.2 REFERENCES

- A. American Society for Testing and Materials (ASTM):

  - 1. TR-2 PVC Range Composition Listing Qualified Ingredients

**1.3 SUBMITTALS**

**A. Submit the following:**

1. Certification of production date of all materials.
2. Manufacturer's certification that the materials delivered were manufactured, sampled, tested, and inspected in accordance with these specifications and appropriate referenced standards.
3. Product data sheet.
4. Manufacturer's recommendations for assembly.

**1.4 QUALITY ASSURANCE**

**A. Make pipe available to the Engineer's Representative for inspection.**

**B. Pipe shall be considered defective and will be rejected when:**

1. Pitted or cratered.
2. Flaking.
3. Straightness varies more than ½ inch in 10 feet.
4. Any defect which prevents assembly according to manufacturer's recommendations.
5. Not utilized within six months of date of production.
6. Pipe is not properly marked.

**C. Material brands and/or pipe classes shall not be mixed.**

**D. Pipe Marking – pipe and fittings shall be marked as follows:**

1. Manufacturer's name, trademark or logo.
2. Nominal size.
3. PVC cell classification.
4. Pipe stiffness designation, dimension ratio, or schedule size and pressure class.
5. ASTM or AWWA specification designation.
6. National Sanitation Foundation approval (pipe for potable water).
7. Production date.

**E. MANUFACTURER REQUIREMENTS**

1. All piping shall be made from PVC compound conforming to cell classification 12454 per ASTM D1784.

**F. FUSION TECHNICIAN REQUIREMENTS**

1. Fusion Technician shall be qualified by the pipe supplier to install fusible PVC pipe. Qualification shall be current as of the actual date of the fusion performance on the project.

**G. SPECIFIED PIPE SUPPLIERS**

1. Fusible polyvinylchloride pipe shall be used as manufactured under the trade names Fusible C-900, or Fusible C-905 for Underground Solutions, Inc. or Engineer approved equal.

**1.5 DELIVERY, STORAGE, AND HANDLING**

- A. Inspect the pipe shipment to identify shifted loads, broken packaging or rough treatment, which could be an indication of damage.
- B. Unload the pipe in a manner which will not put stress on the pipe or strike anything causing damage.
- C. Place and store the pipe package units on level ground stacked no more than 8 feet high. Do not store close to heat sources.
- D. Store gaskets away from excessive exposure to heat, direct sunlight, ozone, oil or grease.
- E. Store Solvent cement in tightly sealed containers away from excessive heat.
- F. Handle pipe in a manner to prevent impact blows, abrasion damage, gouging or cutting.
- G. When handling pipe in cold weather, provide additional care to prevent damage due to impact. Impact strength is reduced in cold weather.

**PART 2 – PRODUCTS**

**2.1 WATER MAIN**

- A. Fusible polyvinylchloride pipe for potable water shall conform to AWWA C900, ASSA C905, or ASTM D2241, as applicable. Testing shall be in accordance with the referenced AWWA standards for all pipe types. Pipe shall be marked verifying suitability for potable water service per NSF-61
- B. Fusible polyvinylchloride pipe shall be extruded with plain ends. The ends shall be square to the pipe and free of any bevel or chamfer. There shall be no bell or gasket of any kind incorporated into the pipe.
- C. The pipe shall be manufactured in a standard 40 foot nominal length or custom lengths, unless otherwise approved by the Engineer.
- D. Pipe shall be blue in color for potable water use.

**2.2 FUSION JOINTS**

- A. Unless otherwise specified, fusible polyvinylchloride pipe lengths shall be assembled in the field with butt-fused joints.

**2.3 FUSIBLE POLYVINYLCHLORIDE SWEEPS OR BENDS**

- A. Sweeps or bends shall conform to the same sizing convention, diameter, dimensional tolerances and pressure class of the pipe being joined by the sweep or bend.
- B. Sweeps or bends shall be manufactured from the same fusible polyvinyl chloride pipe being used for the installation, and shall have at least two feet of straight section on either end of the sweep or bend to allow for fusion of the sweep to the pipe installation.
- C. Angles shall not be greater than 22.5 degrees, and shall be used in nominal diameters ranging from 4-inch through 16-inch.

**PART 3 – EXECUTION**

**3.1 FUSION PROCESS**

- A. Pipe shall be handled in a safe and non-destructive manner before, during, and after the fusion process and in accordance with this specification and the pipe supplier's guidelines.
- B. Pipe shall be fused by a qualified fusion technician.
- C. Pipe supplier's procedures shall be always followed during fusion procedures.
- D. Each fusion shall be recorded and logged by an approved electronic monitoring device (data logger) connected to the fusion machine, which utilizes a current version of the pipe suppliers recommended and compatible software.
- E. Only appropriately sized and outfitted fusion machines that have been approved by the pipe supplier shall be used for the fusion process.

**3.2 GENERAL INSTALLATION**

- A. Installation guidelines from the pipe supplier shall be followed for all installations.
- B. The Pipe shall be installed in a manner so as not to exceed the recommended bending radius guidelines.
- C. Where pipe is installed by pulling in tension, the recommended maximum safe pulling force, established by the pipe supplier, shall not be exceeded.

**END OF SECTION**

**SECTION 33 00 05**

**DOUBLE AND TRIPLE WALLED POLYPROPYLENE PIPE**

**PART 1 – GENERAL**

**1.1 SUMMARY**

**A. Section Includes:**

1. Double walled polypropylene pipe for mainline gravity storm sewer.
2. Triple walled polypropylene pipe for mainline gravity storm sewer.

**B. The products described are not installed under this Section.**

**1.2 REFERENCES**

**A. American Society for Testing and Materials (ASTM):**

1. D3212 Standard Specification for Joints for Drain and Sewer Plastic Pipes Using Flexible Elastomeric Seals
2. F477 Standard Specification for Elastomeric Seals (Gaskets) for Joining Plastic Pipe
3. F2736 Standard Specification for 6 to 27 in. (152 To 762 mm) Polypropylene (PP) Corrugated Single Wall Pipe And Double Wall Pipe
4. F2764 Standard Specification for 30 to 60 in. [750 to 1500 mm] Polypropylene (PP) Triple Wall Pipe and Fittings for Non-Pressure Sanitary Sewer Applications

**1.3 SUBMITTALS**

**A. Submit the following:**

1. Certification of production date of all materials.
2. Manufacturer's certification that the materials delivered were manufactured, sampled, tested, and inspected in accordance with this specifications and appropriate referenced standards.
3. Product data sheet.
4. Manufacturer's recommendations for assembly.

**1.4 QUALITY ASSURANCE**

**A. Make pipe available to the Engineer's Representative for inspection.**

**B. Pipe shall be considered defective and will be rejected when:**

1. Pitted or cratered.
2. Flaking.

3. Straightness varies more than ½ inch in 10 feet.
4. Any defect which prevents assembly according to manufacturer's recommendations.
5. Not utilized within twelve months of date of production.
6. Pipe is not properly marked.

C. Material brands and/or pipe classes shall not be mixed.

D. Pipe Marking – pipe and fittings shall be marked as follows:

1. Manufacturer's name, trademark or logo.
2. Nominal size.
3. Pipe stiffness designation, dimension ration, or schedule size and pressure class.
4. ASTM specification designation.
5. Production date.

#### 1.5 DELIVERY, STORAGE, AND HANDLING

- A. Inspect the pipe shipment to identify shifted loads, broken packaging or rough treatment, which could be an indication of damage.
- B. Unload the pipe in a manner which will not put stress on the pipe or strike anything causing damage.
- C. Place and store the pipe package units on level ground stacked no more than 8 feet high. Do not store close to heat sources.
- D. For onsite gasket installation on pipe, store gaskets away from excessive exposure to heat, direct sunlight, ozone, oil or grease.
- E. For gaskets installed on the pipe offsite, keep the protective wrap on gaskets until installation.
- F. Handle pipe in a manner to prevent impact blows, abrasion damage, gouging or cutting.
- G. When handling pipe in cold weather, provide additional care to prevent damage due to impact.

#### PART 2 – PRODUCTS

##### 2.1 NON-PRESSURE RATED PIPE

A. Mainline Gravity Sewer and Sewer Services

1. Pipe fittings and repair couplings shall be manufactured and tested in accordance with the following standards:
  - a. Sizes 8 inch through 27 inch and depths up to 20 feet: ASTM F2736, PSM SDR-35 PVC
  - b. Sizes 30 inch through 60 inch and depths up to 20 feet: ASTM F2764, PS46 PVC, T-1 minimum cell classification

2. Pipe shall have a minimum pipe stiffness of 46 PSI.
3. Minimum height of cover to the top of pipe to the existing elevation or proposed finished elevation (whichever is less) shall be two feet.
4. Elastomeric Gaskets: Conform with ASTM F477
5. Elastomeric Joints: Conform with ASTM D3212
6. Solvent Weld Joints: Not permitted.

**B. Sewer Services**

1. 4" and 6" pipe shall be Schedule 40 PVC and conform to section 33 00 02, Polyvinyl Chloride (PVC) Pipe and Fittings.
2. Branch laterals shall be designed to accept SDR 35.

**2.2 DEFLECTION TEST REQUIREMENTS**

A. Deflection testing procedures shall conform to Section 01 45 23 10, Testing and Inspection of Pipeline and Appurtenances.

B. The following table shall be used for the mandrel setting for Polypropylene Pipe:

**Table 1  
SaniTite HP Recommended Mandrel Settings**

Pipe Type	Pipe Diameter (Inches)	Minimum Inside Diameter (Inches)	Inside Diameter With 5% Deflection (Inches)
Dual Wall	12	11.90	11.31
	15	14.85	14.11
	18	17.93	17.03
	21	20.79	19.75
	24	23.90	22.71
	30	29.79	28.30
Triple Wall	30	29.62	28.14
	36	35.40	33.63
	42	41.31	39.24
	48	47.31	44.94
	60	59.30	56.34

General Notes

## **1 INTRODUCTION**

### **1.1 GENERAL**

This report presents the results of the subsurface exploration and subgrade evaluation for the proposed East River Drive, Reid Street, and Ridgeway Drive reconstruction, in De Pere, Wisconsin. In addition, this report includes borings in the area of the proposed Kingston Preserve Stormwater Pond at Humana Sports Park, in De Pere, Wisconsin. The work was performed for the City of De Pere, at the request of Mr. Eric Rakers.

### **1.2 PURPOSE**

The purpose of this study was to evaluate the subsurface conditions at specific boring locations and to establish parameters for use by the engineers in preparing the pavement and stormwater pond designs for the proposed projects.

### **1.3 SCOPE**

The scope of services included a summary of the subsurface conditions within the boring depths, a summary of the existing pavement and base course thicknesses, soil classifications, refusal depth (if encountered), and groundwater levels. The scope of the field work, including the number, depth, and locations of the borings was determined by the client.

### **1.4 AUTHORIZATION**

The description of services and authorization to perform this subsurface exploration and evaluation were in the form of a City of De Pere contract dated February 27, 2023, which included PSI Proposal No. PO-0094-390548, dated January 11, 2023. The general conditions for the performance of the work were referenced in the proposal. This report has been prepared on behalf of, and exclusively for the use of the City of De Pere. The information contained in this report may not be relied upon by any other parties without the express written consent of PSI, and acceptance by such parties of PSI's General Conditions.

## **2 SITE AND PROJECT DESCRIPTION**

### **2.1 SITE FEATURES**

#### *Roadway Reconstruction (R-1, ER-1, RW-1)*

The project site is located on East River Drive between Charles Street and Lebrun Street; on Reid Street from Allard Street to the Main Avenue Annex; and on Ridgeway Drive from Libal Street to East River Drive, in De Pere, Wisconsin. At the time of the exploration, the surface of the roadways consisted of asphalt pavement. Usage along the project route consisted primarily of residential properties. A review of historical aerial photography available from Google Earth between the years of 1992 and 2021 indicates that the roadways were present since the earliest

photo taken in 1992. At the time of exploration, the surface of the site was relatively firm, and the truck-mounted drill rig experienced no difficulty accessing the boring locations. The subject sites are depicted on the enclosed Boring Location Plans (Figure 1, 2, and 3).

#### *Kingston Preserve Pond (B-1, B-2)*

The project site is located at the current Humana Sports Park, approximately 1,100 feet northwest of the intersection of Lawrence Drive and Silver Maple Drive, in De Pere, Wisconsin. At the time of exploration, the surface of the site consisted of manicured grass. A review of historical aerial photography available from Google Earth between the years of 1992 and 2022 indicates the surface features of the site appear to have remained relatively similar in appearance to those described above since the earliest photo taken in 1992. The subject site is depicted on the enclosed Boring Location Plan (Figure 4).

The topography of the subject site is relatively flat, with an elevation difference of approximately 1.3 feet between the boring locations. The site generally slopes down towards the west. The surface elevations of the boring locations ranged between about EL. 634.9 and EL. 633.6. At the time of the exploration, the surface of the site was relatively soft; therefore, an ATV mounted drill rig was utilized to access the boring locations.

## **2.2 PROJECT DESCRIPTION**

#### *Roadway Reconstruction (R-1, ER-1, RW-1)*

Based on the information provided by the client, it is understood that the proposed project will consist of the reconstruction of the asphalt roadways on East River Drive between Charles Street and Lebrun Street; on Reid Street from Allard Street to the Main Avenue Annex; and on Ridgeway Drive from Libal Street to East River Drive, in De Pere, Wisconsin. The project will consist of full-depth reconstruction which will include the removal of the existing asphalt pavement and base course. Construction will include concrete curb and gutter. The horizontal and vertical alignments are expected to remain the same, and only nominal cuts and fills of less than 1 foot are anticipated.

#### *Kingston Preserve Pond (B-1, B-2)*

Based on the information provided by the client, it is understood that a stormwater management pond will be located at the current Humana Sports Park in De Pere, Wisconsin. The stormwater management pond will have a bottom elevation of EL. 621.0. The size and other design details were not provided at the time of report preparation. If additional information regarding the roadway or stormwater projects becomes available, or if any of the information discussed herein differs from current plans or changes as design progresses, PSI must be informed so that any necessary revisions to this report can be made.

## **3 EXPLORATION AND LABORATORY PROCEDURES**

### **3.1 SCOPE SUMMARY**

The field and laboratory data utilized in the evaluation and analysis of the subsurface materials was obtained by drilling exploratory test borings, securing soil samples by the split-spoon sampling method, and subjecting the samples to laboratory testing.

With respect to the stormwater management pond, the field and laboratory work for classification of the subgrade soils was performed to provide information for use by the basin design personnel when considering requirements of Chapter NR151 of the Wisconsin Administrative Code, and of WDNR Technical Standard 1002, "Site Evaluation for Stormwater Infiltration" guidelines. The design of the proposed stormwater management area was beyond the scope of services for this project.

### **3.2 FIELD EXPLORATION**

A total of five (5) soil test borings were performed to a depth of about 5 to 20 feet below the existing ground surface. Borings R-1, ER-1, and RW-1 were performed to a depth of about 5 feet in the areas of proposed roadway reconstruction along Reid Street, East River Drive, and Ridgeway Drive, respectively. Borings B-1 and B-2 were performed to a depth of about 20 feet in the proposed stormwater management pond. The number, depths, and locations of the borings were determined by the client. The borings were located in the field by PSI utilizing a handheld GPS device. They are estimated to be accurate to within several feet. The surface elevations shown on the logs were provided by the client.

The soil test borings were performed with a truck-mounted (R-1, ER-1, RW-1) and ATV (B-1, B-2) rotary drilling rig utilizing continuous flight hollow stem augers to advance the holes. Representative samples were obtained by the Standard Penetration Test (SPT) method using split-spoon sampling procedures in general accordance with ASTM D-1586 procedures. Samples were collected at 2.5-foot intervals to 10 feet, and then at 5-foot intervals thereafter to the end of the borings. As an exception, samples were obtained at 2-foot intervals at the borings performed within the proposed stormwater management areas. The standard penetration value (N) is defined as the number of blows of a 140-pound hammer, falling thirty (30) inches, required to advance the split-spoon sampler one (1) foot into the soil. The sampler is lowered to the bottom of the drill hole and the number of blows recorded for each of the three (3) successive increments of six (6) inches of penetration. The "N" value is obtained by adding the second and third incremental numbers. The SPT provides a means of estimating the relative density of granular soils and comparative consistency of cohesive soils, thereby providing a method of evaluating the relative strength and compressibility characteristics of the subsoils.

The SPT soil samples were transferred into clean glass jars immediately after retrieval and returned to the laboratory upon completion of the field operations. Samples will be discarded unless other instructions are received. All soil samples were visually classified in general accordance with the Unified Soil Classification System (ASTM D-2488-75). The samples

collected within the stormwater management areas were visually classified by a certified soil tester in general accordance with USDA National Resources Conservation Service textural soil classification procedures. A description of the subsurface conditions encountered at each boring location is shown on the enclosed Soil Boring Logs.

A copy of the Soil Boring Logs and Boring Location Plan (Figure 1) are enclosed in the Appendix. The soil stratification shown on the logs represents the approximate soil conditions in the actual boring locations at the time of the exploration. The terms and symbols used on the logs are described in the General Notes found in the Appendix.

### **3.3 LABORATORY PHYSICAL TESTING**

Soil samples obtained from the exploration were visually classified in the laboratory, and subjected to testing, which included moisture content determinations. Selected cohesive soil samples were tested in unconfined compression with an uncontrolled strain loading rate and/or with a calibrated hand penetrometer to aid in evaluating the soil strength characteristics. The values of strength tests performed on soil samples obtained by the Standard Penetration Test Method (SPT) are considered approximate, recognizing that the SPT method provides a representative but somewhat disturbed soil sample.

The laboratory testing was performed in general accordance with the respective ASTM methods, as applicable, and the results are shown on the boring logs and Laboratory Data Sheets in the Appendix.

## **4 DESCRIPTION OF SUBSURFACE CONDITIONS**

### **4.1 GENERAL**

A description of the subsurface conditions encountered at the test boring locations is shown on the Soil Boring Logs. The lines of demarcation shown on the logs represent approximate boundaries between the various soil classifications. It must be recognized that the soil descriptions are considered representative for the specific test boring location, but that variations may occur between and beyond the sampling intervals and boring locations. Soil depths, topsoil and layer thicknesses, and demarcation lines utilized for preconstruction planning should not be expected to yield exact and final quantities. A summary of the major soil profile components is described in the following paragraphs.

### **4.2 SUBSURFACE CONDITIONS**

#### *Reid Street Reconstruction (R-1)*

The surface of the site at R-1 consisted of about 5 inches of asphalt, underlain by about 7 inches of base course consisting of brown coarse to fine sand with gravel. Beneath the base course, the underlying natural soils generally consisted of reddish-brown clay to the maximum depth explored by the boring.

### *East River Drive Reconstruction (ER-1)*

The surface of the site at ER-1 consisted of about 4.5 inches of asphalt, underlain by about 9.5 inches of base course consisting of brown coarse to fine sand with gravel. Fill, generally comprised of brown clayey sand with trace gravel, was present to a depth of about 3 feet (EL. 587.4) below ground surface. The underlying natural soils generally consisted of brown silt with clay to the maximum depth explored by the boring.

### *Ridgeway Drive Reconstruction (RW-1)*

The surface of the site at RW-1 consisted of about 4.5 inches of asphalt, underlain by about 7.5 inches of base course consisting of dark brown coarse to fine sand with gravel. Fill, generally comprised of brown sandy clay with trace gravel, was present to a depth of about 3 feet (EL. 593.7) below ground surface. The underlying natural soils generally consisted of reddish-brown clay to the maximum depth explored by the boring.

The fill and buried topsoil materials were classified as such based on their varied visual characteristics and composition. However, it must be recognized that in the absence of foreign substances and/or debris within the soil samples obtained, it is often difficult to distinguish between natural soils and clean soil fill.

The cohesive fill soils encountered in RW-1 were generally medium stiff in comparative consistency, with Standard Penetration Resistances (N-values) of about 9 blows per foot (bpf). The granular fill soils encountered in ER-1 were generally medium dense in comparative consistency with N-values of about 13 blows per foot (bpf). The natural granular soils encountered in ER-1 were generally dense in comparative consistency with N-values of about 18 blows per foot (bpf). The natural cohesive soils encountered in the borings were generally stiff to very stiff in comparative consistency, with N-values ranging from about 11 to 19 bpf, and unconfined compressive strengths ranging from about 1.8 to 3.75 tons per square foot (tsf).

### *Stormwater Pond (B-1, B-2)*

The surface of the site at the stormwater pond borings B-1 and B-2 consisted of about 2 and 9 inches of topsoil, respectively, comprised of dark reddish brown silty clay loam. The underlying natural soils consisted of reddish brown to reddish gray silty clay loam and silty clay to the maximum depths explored by the borings.

The natural cohesive soils at B-1 and B-2 were soft to very stiff in comparative consistency, with N-values ranging from about 7 to 25 blows per foot (bpf), and unconfined compressive strengths ranging from about 0.3 to 2.2 tons per square foot (tsf).

### 4.3 GROUNDWATER OBSERVATIONS

Groundwater observations were made during the drilling operations and in the open boreholes upon completion. Groundwater was not encountered during drilling or upon completion and removal of the augers in the boreholes. B-1 and B-2 caved at depths of about 9 and 14 feet, respectively, below existing grade; therefore, observations could not be made below the cave depths. The groundwater observations reported herein are considered approximate. It must be recognized that groundwater levels fluctuate with time due to variations in seasonal precipitation, lateral drainage conditions, and soil permeability characteristics. Longer term monitoring would be required to further evaluate groundwater levels on this site.

## 5 EVALUATION AND RECOMMENDATIONS

### 5.1 PAVEMENT DESIGN RECOMMENDATIONS

On the basis of the data obtained in the exploration and laboratory testing, the subgrade soils encountered along the roadway project routes generally consisted of clay, clayey sand, and sandy clay fill. The clay soils, with the poorer support characteristics, have been assigned an estimated visual classification of A-6 by the AASHTO soil classification method and CL by the USCS classification system. They are generally rated as poor in applications for pavement subgrade. These soils are also generally poorly drained, can exhibit low bearing support when wet, have moderate to high shrink-swell potential, and high frost susceptibility.

Evaluation of the visual soil classifications and laboratory testing information has been made in determining pertinent engineering properties of the subgrade soils. Based on the engineering properties determined from the subgrade soils tested, and with proper subgrade preparation and drainage, the following pavement subgrade design coefficients are recommended for pavement section thickness design along the entire roadway alignment. These values are representative of the support conditions exhibited by the anticipated clay subgrade materials. All fill used to raise grades or replace unsuitable materials must have equal or greater support characteristics.

#### PAVEMENT SUBGRADE DESIGN COEFFICIENTS

AASHTO Soil Classification	A-6
Design Frost Index	F-3
Design Group Index	15
Soil Support Value	3.8
Estimated Subgrade Modulus (k)	125 pci

### 5.2 SELECTIVE SUBGRADE REMOVAL AND REPLACEMENT

The soils encountered in the borings can generally be used as the pavement subgrade, provided the soils are evaluated and prepared as discussed in this report. However, zones of

unsuitable soils may be encountered, especially within existing fill materials. Therefore, some removal and replacement may be required, and may become extensive, at least in isolated areas. In addition, the majority of the soils along the project route are highly moisture sensitive and subject to substantial instability in the presence of water, especially when exposed to construction traffic. During wet and/or cool weather, softened subgrade soils can be expected to develop over large areas. This can result in the need for substantial drying times; significant reworking, drying, discing; and/or the necessity for removal and replacement with crushed stone or compacted structural fill.

### **5.3 SITE DRAINAGE**

In general, the subgrade soils encountered in the borings are considered to be poorly drained. Drainage action of the subgrade is dependent on the amount of fines (silt and clay) present. The presence of fines decreases the drainability of a soil, and therefore, increases its sensitivity to moisture and frost, which can result in increased instability. In addition, the proposed project is located in an area that experiences annual freezing cycles and the subgrade soils encountered have been classified as moderately to highly susceptible to frost action when free water is present.

The detrimental effects of frost action within frost susceptible subgrade materials are manifested by non-uniform heave of pavements during winter months and/or the loss of strength of the subgrade during thawing periods. In order to maintain a relatively dry subgrade condition and reduce the potential for frost action, it will be necessary to control surface runoff and water seepage as complete removal and replacement of the frost susceptible subgrade soils is not considered economically feasible. Adequate longitudinal slope should be provided to maintain runoff below the top of the pavement subgrade, and proper base course drainage must be provided.

## **6 CONSTRUCTION CONSIDERATIONS**

### **6.1 PAVEMENT SUBGRADE PREPARATION**

The presence of organic topsoil and vegetation within the subgrade can adversely affect the serviceability pavements placed upon them. The surface at the borings was typically covered with asphalt pavement. However, if any topsoil, vegetation, trees, roots, organic matter, and other unsuitable materials are encountered on the surface at the time of construction, they must be removed from the areas of pavements.

After removal of the existing asphalt pavement and base course, the exposed subgrade should be prepared as outlined in Section 211 of the WisDOT Standard Specifications. The subgrade should be thoroughly proofrolled to detect unstable, yielding or unsuitable soils, which must be removed or improved by appropriate preparation and compaction techniques. Scarification and drying of unsuitable soils, or removal and replacement with suitable fill, are two methods, which can be considered. This should be determined at the time of construction by a qualified soils engineer. Low areas may then be raised to the planned grades with suitable properly

compacted fill where necessary. Substantial areas of soft, wet, or otherwise unsuitable soils, requiring undercutting and removal, may be encountered.

In areas where organic, wet, soft or yielding subgrade conditions are encountered during subgrade preparation or a stable subgrade cannot be obtained, selective excavation below subgrade (EBS) and replacement may be required for proper support of new fills. Excavation below subgrade (EBS) should be performed as outlined in Section 205 of the WisDOT Standard Specifications. The necessity and ultimate extent of undercutting will be dependent upon the soil type encountered, moisture condition, and stability of the exposed subgrade at the time of construction. In areas of EBS, limited excavation below subgrade to a depth of 2 feet and replacement with granular fill, such as those specified in Section 305 of the WisDOT Standard Specification for ¾-inch or 1¼-inch materials, can generally be used to improve the stability of the subgrade. It must be recognized that soil stability is dependent on such factors as soil type and moisture content, weather conditions at the time of construction, and also construction disturbance. Thus, the necessity of EBS generally must be determined in the field at the time of construction, based upon observations made during subgrade preparation.

If relatively wet or unstable soils are encountered below EBS, it may be necessary to use an SAS (Subgrade Aggregate Separation) geotextile fabric and/or a select crushed material for stabilization (such as that specified in Section 312 of the WisDOT Standard Specifications) before placing backfill soils. The SAS geotextile fabric used in this application should meet the physical requirements identified in Section 645 of the WisDOT Standard Specifications and shown in the following table.

Test	Units	Values
Grab Tensile Strength	N	750 min.
Puncture Strength	N	300 min.
Apparent Opening Size	um	212 max.
Permittivity	s <sup>-1</sup>	0.35 min.

The fine-grained soils present within the subgrade are considered sensitive to moisture and construction activity; therefore, every effort should be made to prevent ponding during construction operations and maintain a relatively dry and stable working subgrade. If the soils become disturbed, removal and replacement may be required.

## 6.2 BORROW MATERIAL

Generally, granular material with low fines contents is recommended for use in regrading, or to replace unsuitable soils, such as those specified in Section 305 of the WisDOT Standard Specification for ¾-inch or 1¼-inch materials. Clayey and silty soils, organic materials, and wet granular soils are not considered suitable for such purposes. All fill used must have subgrade design coefficients equal to or greater than those previously specified. Importing of suitable granular fill may be necessary.

### **6.3 FILL PLACEMENT AND COMPACTION**

Fill should be placed in layers of not more than 9 inches in loose thickness before compaction. As an exception, when the fill consists of well-graded granular material and the compaction equipment is adequate for such purpose, the loose layer thickness may be increased to a maximum of 12 inches. Each lift must be compacted to a density of at least 95 percent of the maximum dry density as determined by the Standard Proctor method, ASTM designation D-698.

Proper moisture control is essential to reduce the amount of compactive effort necessary to achieve the desired densities. This is especially true of silty and clayey soils, where scarification and aeration may be required to achieve near-optimum moisture levels prior to compaction. It is recommended the fill soils be placed at moisture contents within a few percent of their optimum moisture content. Depending upon seasonal moisture conditions, some drying and/or reworking of these fine-grained soils may be necessary prior to placement.

The selection of fill materials for various applications should be done in consultation with the soils engineer. Similarly, the evaluation of the subgrade preparation, and placement and compaction of fill for structural application should be monitored and tested by a qualified representative of the soils engineer.

Adequate compaction must be performed so that the pavement subgrade materials develop the subgrade design coefficients previously specified for adequate pavement section thickness design. Compaction should be performed with equipment suitable for such purpose, such as a sheepfoot roller for clayey soils, and a vibratory smooth drum roller for granular material.

### **6.4 GROUNDWATER CONTROL**

Because no groundwater was encountered in the upper levels of the boreholes during the exploration, no major difficulties during excavation and construction work is anticipated on this site. A gravity drainage system and a filtered sump pump should be adequate to control isolated small volume perched water, (which can sometimes occur within existing base course materials) if encountered. However, if larger volume perched zones are encountered, or if groundwater levels rise due to seasonal variations, more comprehensive dewatering with a series of sump pumps may be required.

Since the anticipated subgrade soils are subject to softening when exposed to free moisture, every effort should be made to keep excavations dry. Site grading should be performed to direct runoff away from the construction area, so that the potential for the softening of the subgrade soils is reduced.

While no groundwater was encountered at the time the borings were drilled, seasonal variations in precipitation, site drainage conditions, soil permeability, and other factors can cause groundwater or perched zones to be present in the upper soils at other times of the year, including during construction.

## 6.5 SUBGRADE FROST ACTION

The proposed road project is located in an area that experiences annual freezing cycles and the subgrade soils encountered have been classified as moderate to highly susceptible to frost action when free water is present. Therefore, some frost movement may be experienced. Adequate drainage/sloping must be provided.

## 6.6 STORMWATER MANAGEMENT CONSIDERATIONS

Based on the information provided by client, it is understood that the proposed project will consist of the construction of a stormwater management pond. The stormwater management pond will have a bottom elevation of EL. 621.0. The size and other design details were not provided at the time of report preparation. When design details of the stormwater management pond become available, they must be provided to PSI to determine if a re-evaluation of the recommendations provided herein is necessary.

Samples of the subgrade soils encountered in B-1 and B-2 have been visually classified in general accordance with the USDA textural soil classification system. The subgrade soils encountered below the surface topsoil consisted of reddish brown to reddish gray silty clay loam and silty clay to the maximum depths explored by the borings. Groundwater was not encountered during drilling or upon completion at the boring locations.

With regard to the above soil and groundwater conditions encountered at the borings, NR 151.124(4)(c)1 and 2 – *Infiltration rate exemptions* indicates that infiltration practices located in an area where the infiltration rate of the soil measured at the proposed bottom of the infiltration system is less than 0.6 inches per hour using a scientifically credible field test method; or an area where the least permeable soil horizon to 5 feet below the proposed bottom of the infiltration system using the USDA method of soils analysis consists of sandy clay loam, clay loam, silty clay loam, sandy clay, silty clay or clay may be credited toward meeting the requirements, but the decision to infiltrate under these conditions is optional. In addition, NR 151.124(4)(b)1 – *Separation distances* indicates that infiltration practices shall be located so that the characteristics of the soil and the separation distance between the bottom of the infiltration system and the elevation of seasonal high groundwater or the top of bedrock are in accordance with the following Table (reproduced from NR 151.124):

<b>Table 3. Separation Distances and Soil Characteristics</b>		
<b>Source Area</b>	<b>Separation Distance</b>	<b>Soil Characteristics</b>
Industrial, Commercial, Institutional Parking Lots and Roads	5 feet or more	Filtering Layer*
Residential Arterial Roads	5 feet or more	Filtering Layer*

Roofs Draining to Surface Infiltration Practices	1 foot or more	Native or Engineered Soil with Particles Finer than Coarse Sand
Roofs Draining to Surface Infiltration Practices	Not Applicable	
All Other Impervious Source Areas	3 feet or more	Filtering Layer*

\*Defined in NR 151.002(14r) as a "soil that has at least a 3-foot deep layer with at least 20 percent fines; or at least a 5-foot deep layer with at least 10 percent fines; or an engineered soil with an equivalent level of protection as determined by the regulatory authority for the site."

The information presented above is provided as general guidance for considering stormwater management in conjunction with the encountered subsurface conditions. However, please consult Chapter NR151 of the Wisconsin Administrative Code, the Site Evaluation for Stormwater Infiltration (1002) document, or other applicable references must be consulted for appropriate site-specific stormwater design guidance and requirements.

Stormwater management basins are not recommended to be placed in close proximity to basements or other below grade structures. Proper and careful consideration of soils and subsurface conditions must be given during site and design planning, and extreme care must be exercised during construction. Lateral migration of water may result in substantially increased sump pump activity and can quickly overcome the ability of such pumps to maintain a desirable water level, resulting in significant flooding. The potential for such conditions to occur can greatly increase when basement floors are below the elevation of basin bottoms and/or when basins are placed in close proximity to structures (strongly not recommended). In addition, the presence of granular or other generally permeable soils, which is typically necessary in the areas of structures, especially within utility backfill, alongside basement walls, or within other development excavations, can act as extensive migration channels to rapidly carry large volumes of water from basins and into nearby basements. Building codes or municipal regulations may require that basement floor elevations be a specified distance above the water level of nearby basins. It is therefore recommended that the design engineer (or other appropriate representative) review applicable municipal requirements, and if necessary, verify the design normal and design high water elevations of stormwater basins with respect to planned basement slab elevations.

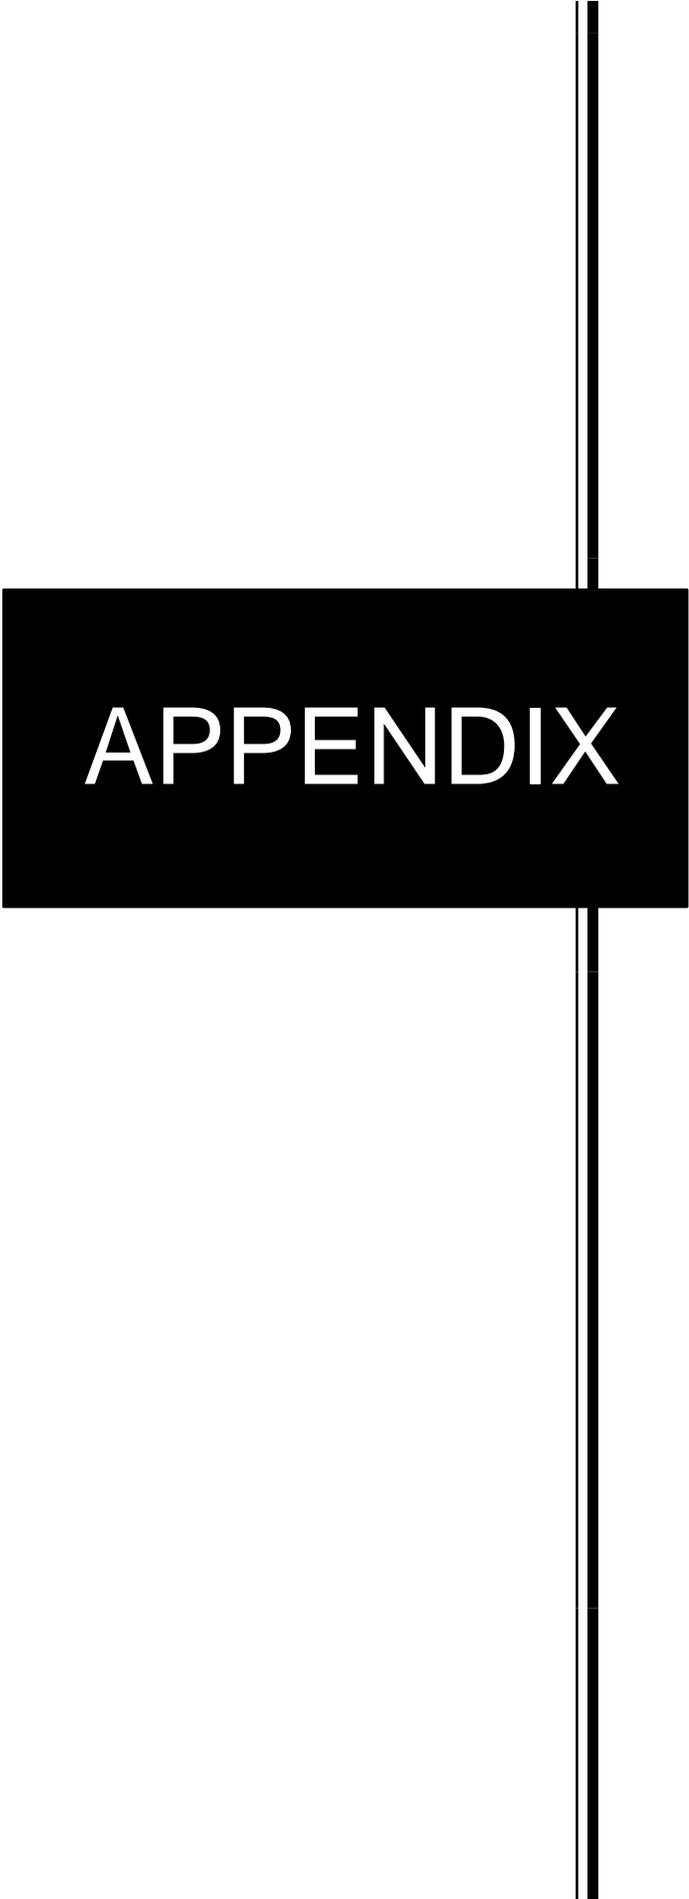

## 7 GENERAL COMMENTS

This geotechnical exploration and foundation evaluation has been prepared to aid in the evaluation of the foundation conditions on this site. The recommendations presented herein are based on the available soil information and the design information provided. Any changes in the design information or building locations should be brought to the attention of the soils engineer to determine if modifications in the recommendations are required. The final design plans and specifications should also be reviewed by the soils engineer to determine that the recommendations presented herein have been interpreted and implemented as intended.

This geotechnical study has been conducted in a manner consistent with that level of care ordinarily exercised by members of the profession currently practicing in the same locality under similar conditions. The findings, recommendations and opinions contained herein have been promulgated in accordance with generally accepted practice in the fields of foundation engineering, soils mechanics, and engineering geology. No other representations, expressed or implied, and no warranty or guarantee is included or intended in this report.

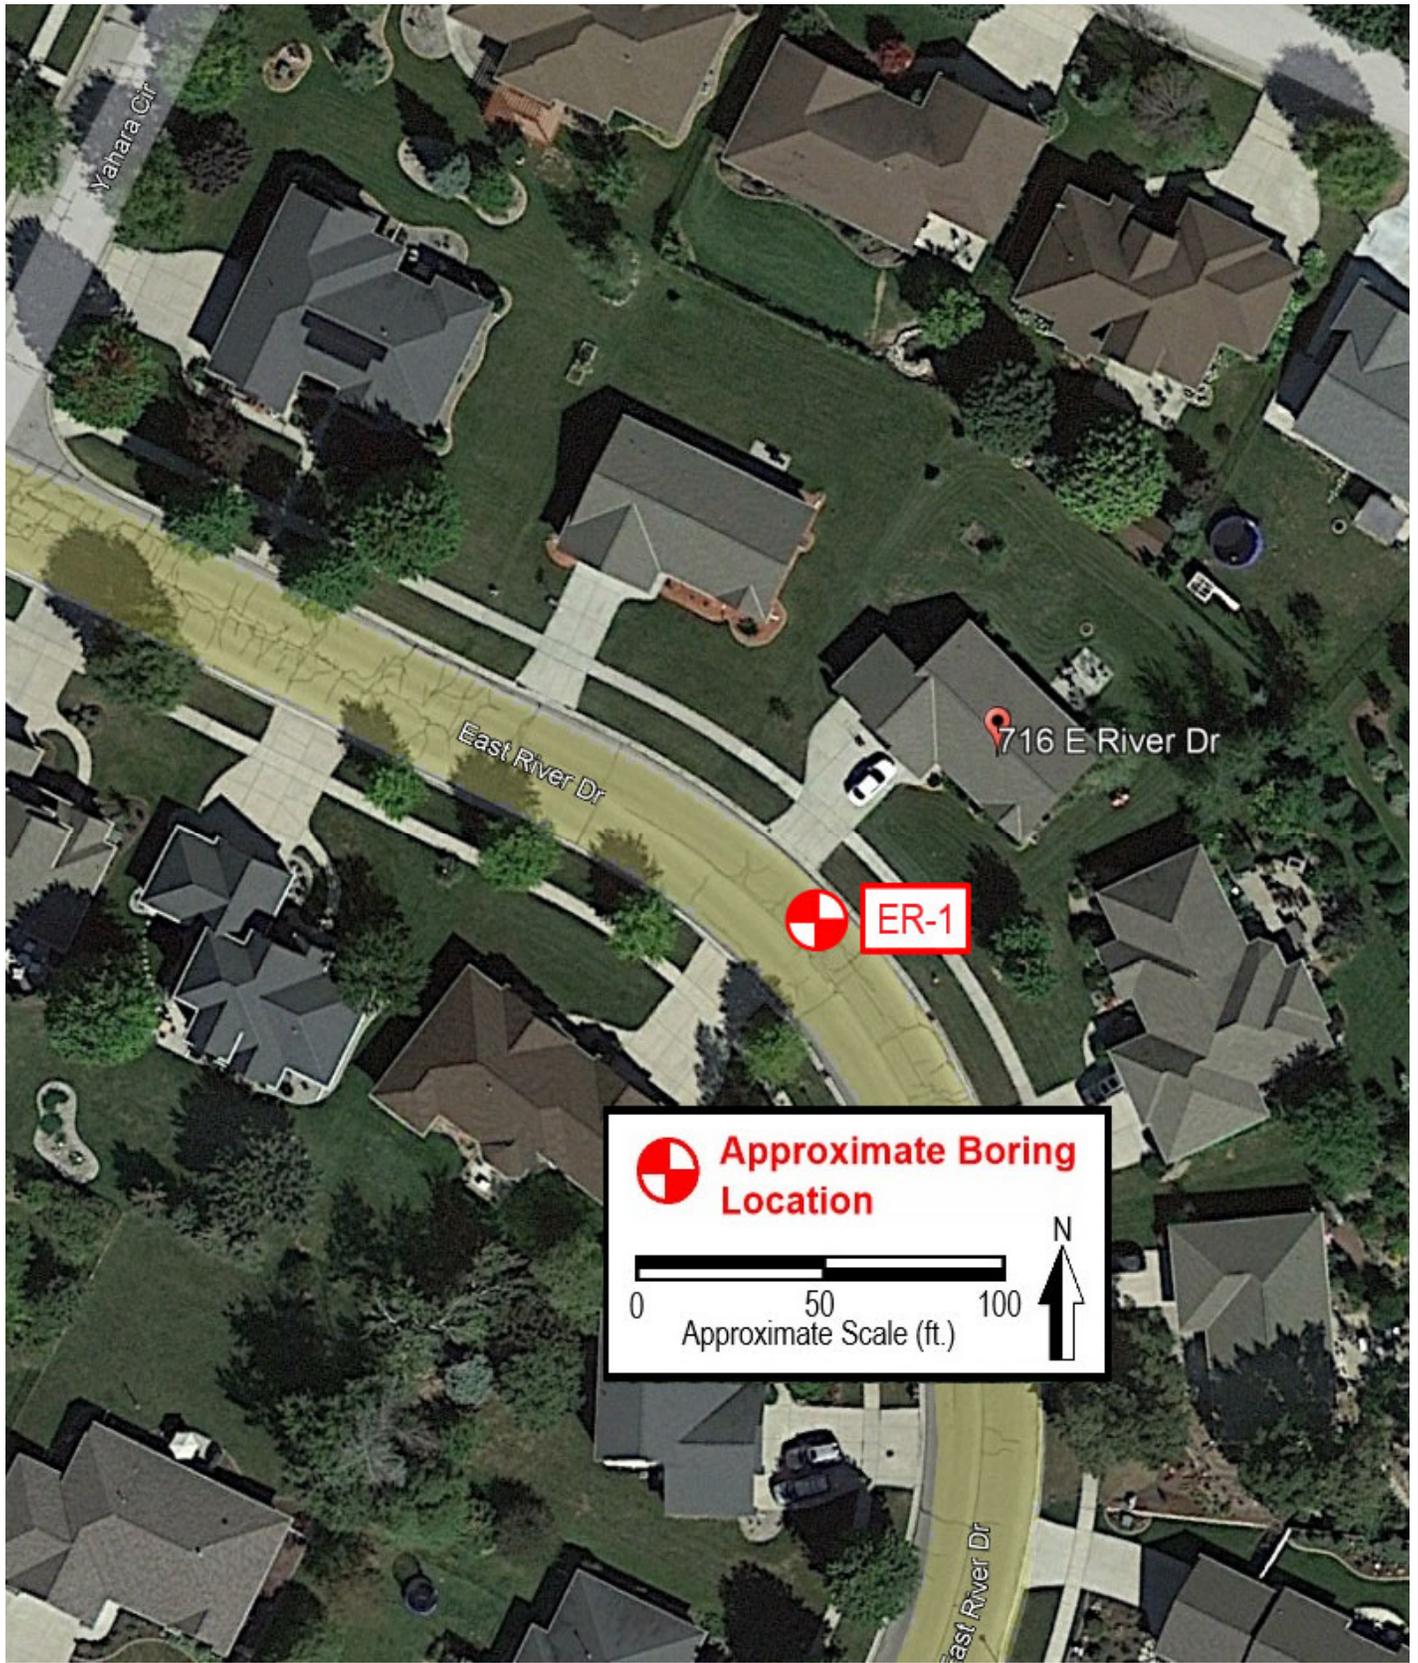

It is recommended that the earthwork and foundation operations be monitored by the soils engineer, to test and evaluate the bearing capacities, and the selection, placement and compaction of controlled fills.

# GENERAL NOTES

## SAMPLE IDENTIFICATION

- Information on each log is a compilation of subsurface conditions, based on visual soil classifications of soil samples obtained from the field as assigned by a soils engineer, as well as from laboratory testing of samples, if performed. The strata lines on the logs may be approximate or the transition between the strata may be gradual rather than distinct. Water level measurements refer only to those observed at the times and locations indicated, and may vary with time, geologic condition and construction activity.
- Unified Soil Classification System (USCS) designations are based on visual soil classification estimates on the basis of textural and particle size categorization and various soil behavior characteristics. If laboratory tests were performed to classify the soil, the USCS designation is shown in parenthesis.

## USCS SOIL PARTICLE SIZE CLASSES

U.S. Std. Sieve		#200	#40	#10	#4	¾"	3"	12"	
Soil Type	Clay	Silt	Sand			Gravel		Cobbles	Boulders
			Fine	Medium	Coarse	Fine	Coarse		
Millimeters	0.002	0.074	0.42	2	4.8	19	76	300	

## UNIFIED SOIL CLASSIFICATION SYSTEM (ASTM D2487-00)

Criteria for assigning group symbols and group names using laboratory tests <sup>A</sup>				Soil Classification	
				Group Symbol	Group Name <sup>B</sup>
COARSE-GRAINED SOILS (More than 50% retained on No. 200 sieve)	Gravels (More than 50% of coarse fraction retained on No. 4 sieve)	Clean gravels w/ < 5% fines <sup>E</sup>	$Cu \geq 4$ and $1 \leq Cc \leq 3$ <sup>C</sup>	GW	Well-graded gravel <sup>D</sup>
			$Cu < 4$ and/or $1 > Cc > 3$ <sup>C</sup>	GP	Poorly graded gravel <sup>D</sup>
		Gravels w/ > 12% fines <sup>E</sup>	Fines classify as ML or MH	GM	Silty gravel <sup>D,F,G</sup>
			Fines classify as CL or CH	GC	Clayey gravel <sup>D,F,G</sup>
	Sands (More than 50% of coarse fraction passes the No. 4 sieve)	Clean sands w/ < 5% fines <sup>I</sup>	$Cu \geq 6$ and $1 \leq Cc \leq 3$ <sup>C</sup>	SW	Well-graded sand <sup>H</sup>
			$Cu < 6$ and/or $1 > Cc > 3$ <sup>C</sup>	SP	Poorly graded sand <sup>H</sup>
		Sands w/ > 12% fines <sup>I</sup>	Fines classify as ML or MH	SM	Silty sand <sup>F,G,H</sup>
			Fines classify as CL or CH	SC	Clayey sand <sup>F,G,H</sup>
FINE-GRAINED SOILS (More than 50% passes the No. 200 sieve)	Silt and clays w/ liquid limit (LL) < 50	Inorganic	PI > 7 and plots on or above "A" line <sup>J</sup>	CL	Lean clay <sup>K,L,M</sup>
			PI < 4 and plots below "A" line <sup>J</sup>	ML	Silt <sup>K,L,M</sup>
		Organic	LL (Oven dried) / LL (Not dried) < 0.75	OL	Organic clay <sup>K,L,M,N</sup>
				OL	Organic silt <sup>K,L,M,O</sup>
	Silt and clays w/ liquid limit (LL) ≥ 50	Inorganic	PI plots on or above "A" line	CH	Fat clay <sup>K,L,M</sup>
			PI plots below "A" line	MH	Elastic silt <sup>K,L,M</sup>
		Organic	LL (Oven dried) / LL (Not dried) < 0.75	OH	Organic clay <sup>K,L,M,P</sup>
				OH	Organic silt <sup>K,L,M,Q</sup>
HIGHLY ORGANIC SOILS	Primarily organic matter, dark in color, and organic odor		PT	Peat	

<sup>A</sup> Based on the material passing the 3-inch (75 mm) sieve

<sup>B</sup> If field sample contained cobbles or boulders, or both, add "with cobbles or boulders, or both" to group name

<sup>C</sup>  $Cu = D_{60}/D_{10}$ ;  $Cc = (D_{30})^2 / D_{10} \times D_{60}$

<sup>D</sup> If soil contains ≥ 15% sand, add "with sand" to group name

<sup>E</sup> Gravels with 5 to 12% fines require dual symbols:

- GW-GM well-graded gravel with silt
- GW-GC well-graded gravel with clay
- GP-GM poorly graded gravel with silt
- GP-GC poorly graded gravel with clay

<sup>F</sup> If fines classify as CL-ML, use dual symbol GC-GM, or SC-SM

<sup>G</sup> If fines are organic, add "with organic fines" to group name

<sup>H</sup> If soil contains ≥ 15% gravel, add "with gravel" to group name

<sup>I</sup> Sands with 5 - 12% fines require dual symbols:

- SW-SM well-graded sand with silt
- SW-SC well-graded sand with clay
- SP-SM poorly graded sand with silt
- SP-SC poorly graded sand with clay

<sup>J</sup> If Atterberg limits plot in hatched area, soil is a CL-ML, silty clay

<sup>K</sup> If soil contains 15 - 29% plus No. 200, add "with sand" or "with gravel"

<sup>L</sup> If soil contains ≥ 30% plus No. 200, predominantly sand, add "sandy" to group name

<sup>M</sup> If soil contains ≥ 30% plus No. 200, predominantly gravel, add "gravelly" to group name

<sup>N</sup> PI ≥ 4 and plots on or above "A" line

<sup>O</sup> PI < 4 or plots below "A" line

<sup>P</sup> PI plots on or above "A" line

<sup>Q</sup> PI below "A" line

## RELATIVE SOIL COMPOSITION

- Trace - 0 - 15% of sample
- With - 15 - 35% of sample
- Soil modifier - > 35% of sample (i.e. sandy, silty, clayey, gravelly)

## DRILLING & SAMPLING SYMBOLS

- |                                 |   |
|---------------------------------|---|
| AU - Auger sample from cuttings | SS - Split spoon sample (2" O.D. by 1½" I.D.) |
| BS - Bag sample                 | ST - Shelby Tube sample (2" or 3" O.D.)       |
| HA - Hand auger sample          | WS - Wash sample from wash water return       |

## SOIL PROPERTY SYMBOLS

- N - N-value (blow count) is the standard penetration resistance based on the total number of blows required to advance a split spoon sampler one (1) foot, using a 140 lb. hammer with a 30 inch free fall. To avoid damage to sampling tools, driving is typically limited to 50 blows during any 6 inch interval. Additional description is provided below:

<u>N-value (bpf)</u>	<u>Description</u>
HW	Sampler penetrated soil under weight of hammer and rods; no driving required
25	25 blows to advance sampler 12 inches after initial 6 inches of seating
75/10"	75 blows to advance sampler 10 inches after initial 6 inches of seating
50/S3"	50 blows to advance sampler 3 inches during initial 6 inch seating interval

- |  |   |
|--|---|
| MC - Moisture content, %   | LL - Liquid limit, % (ASTM D4318)                   |
| Qu - Unconfined compressive strength, tons per square foot (tsf)     | PL - Plastic limit, % (ASTM D4318)                  |
| Qp - Calibrated hand penetrometer resistance, tsf                    | PI - Plasticity index, % (ASTM D4318)               |
| γ <sub>d</sub> - Dry density, pounds per cubic foot (pcf)            | %P200 - Percent of sample passing the No. 200 sieve |
| RQD - Rock quality designation of NX-size core sample                |   |
| RMR - Rock mass rating, as developed by Z.T. Bieniawski              |   |
| PID - Photoionization detector (Hnu meter) volatile vapor level, ppm |   |

## SOIL RELATIVE DENSITY & CONSISTENCY CLASSIFICATION

NON-COHESIVE SOILS		COHESIVE SOILS		
Density	N-Value Range	Consistency	Qu Range (tsf)	Approximate N-value Range
Very loose	0 - 3	Very soft	0 - 0.25	0 - 2
Loose	3 - 7	Soft	0.25 - 0.5	2 - 5
Medium dense	7 - 15	Medium stiff	0.5 - 1.0	5 - 10
Dense	15 - 38	Stiff	1.0 - 2.0	10 - 14
Very dense	38+	Very Stiff	2.0 - 4.0	14 - 32
		Hard	4.0+	32+

## SOIL STRUCTURE TERMINOLOGY

- |   |   |
|---|---|
| Interlayered - Alternating layers of different soil types | Intermixed - Pockets of different soil types, no layering       |
| Layer - Inclusion greater than 3 inches thick             | Pocket - Inclusion of material of different texture             |
| Seam - Inclusion ¼ to 3 inches thick                      | Varved - Alternating layers or seams of sand, silt, and/or clay |
| Laminated - Alternating seams of different soil type      |   |

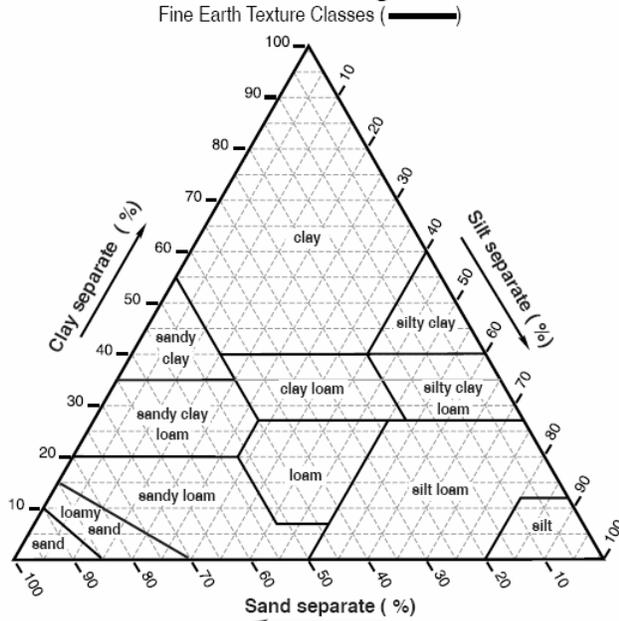

## GROUNDWATER & MOISTURE CONDITIONS

- |  |  |
|--|--|
| ∇ - Approximate groundwater level as noted during drilling and sampling            | Dry - Absence of moisture, dry to the touch                    |
| ▼ - Groundwater level as noted within the open borehole upon removal of the augers | Moist - Damp, but no visible water                             |
| ¥ - Delayed groundwater level within open borehole                                 | Wet - Visible free water, saturated, usually below water table |

NOTE: General Notes have been adapted from and incorporate portions of ASTM D2487 "Classification of Soils for Engineering Purposes (Unified Soil Classification System)" and ASTM D2488 "Description and Identification of Soils (Visual-Manual Procedure)."

# USDA SOIL CLASSIFICATION SYSTEM\*

## Texture Triangle:

**NOTE: Soil Texture** encompasses only the fine earth fraction ( $\leq 2$  mm).

**Particle Size Distribution (PSD)** encompasses the whole soil, including both the fine earth fraction ( $\leq 2$  mm; weight %) and rock fragments ( $> 2$  mm; volume %).

## TEXTURE CLASS

**TEXTURE MODIFIERS** - Conventions for using "Rock Fragment Texture Modifiers" and for using textural adjectives that convey the "% volume" ranges for **Rock Fragments - Size and Quantity**.

Fragment Content % By Volume	Rock Fragment Modifier Usage
< 15	No texture adjective is used (noun only; e.g., <i>loam</i> ).
15 to < 35	Use adjective for appropriate size; e.g., <i>gravelly</i> .
35 to < 60	Use "very" with the appropriate size adjective; e.g., <i>very gravelly</i> .
60 to < 90	Use "extremely" with the appropriate size adjective; e.g., <i>extremely gravelly</i> .
$\geq 90$	No adjective or modifier. If $\leq 10\%$ fine earth, use the appropriate noun for the dominant size class; e.g., <i>gravel</i> . Use <b>Terms in Lieu of Texture</b> .

## TEXTURE MODIFIERS - (adjectives)

ROCK FRAGMENTS: Size & Quantity <sup>1</sup>	Code		Criteria: Percent (By Volume) of Total Rock Fragments and Dominated By (name size): <sup>1</sup>
	Conv.	PDP/NASIS	
<b>ROCK FRAGMENTS (<math>&gt; 2</math> mm; <math>\geq</math> Strongly Cemented)</b>			
Gravelly	GR	GR	$\geq 15\%$ but $< 35\%$ gravel
Fine Gravelly	FGR	GRF	$\geq 15\%$ but $< 35\%$ fine gravel
Medium Gravelly	MGR	GRM	$\geq 15\%$ but $< 35\%$ med. gravel
Coarse Gravelly	CGR	GRC	$\geq 15\%$ but $< 35\%$ coarse gravel
Very Gravelly	VGR	GRV	$\geq 35\%$ but $< 60\%$ gravel
Extremely Gravelly	XGR	GRX	$\geq 60\%$ but $< 90\%$ gravel
Cobbly	CB	CB	$\geq 15\%$ but $< 35\%$ cobbles
Very Cobbly	VCB	CBV	$\geq 35\%$ but $< 60\%$ cobbles
Extremely Cobbly	XCB	CBX	$\geq 60\%$ but $< 90\%$ cobbles
Stony	ST	ST	$\geq 15\%$ but $< 35\%$ stones
Very Stony	VST	STV	$\geq 35\%$ but $< 60\%$ stones
Extremely Stony	XST	STX	$\geq 60\%$ but $< 90\%$ stones
Bouldery	BY	BY	$\geq 15\%$ but $< 35\%$ boulders
Very Bouldery	VBY	BYV	$\geq 35\%$ but $< 60\%$ boulders
Extremely Bouldery	XBY	BYX	$\geq 60\%$ but $< 90\%$ boulders
Channery	CN	CN	$\geq 15\%$ but $< 35\%$ channers
Very Channery	VCN	CNV	$\geq 35\%$ but $< 60\%$ channers
Extremely Channery	XCN	CNX	$\geq 60\%$ but $< 90\%$ channers
Flaggy	FL	FL	$\geq 15\%$ but $< 35\%$ flagstones
Very Flaggy	VFL	FLV	$\geq 35\%$ but $< 60\%$ flagstones
Extremely Flaggy	XFL	FLX	$\geq 60\%$ but $< 90\%$ flagstones

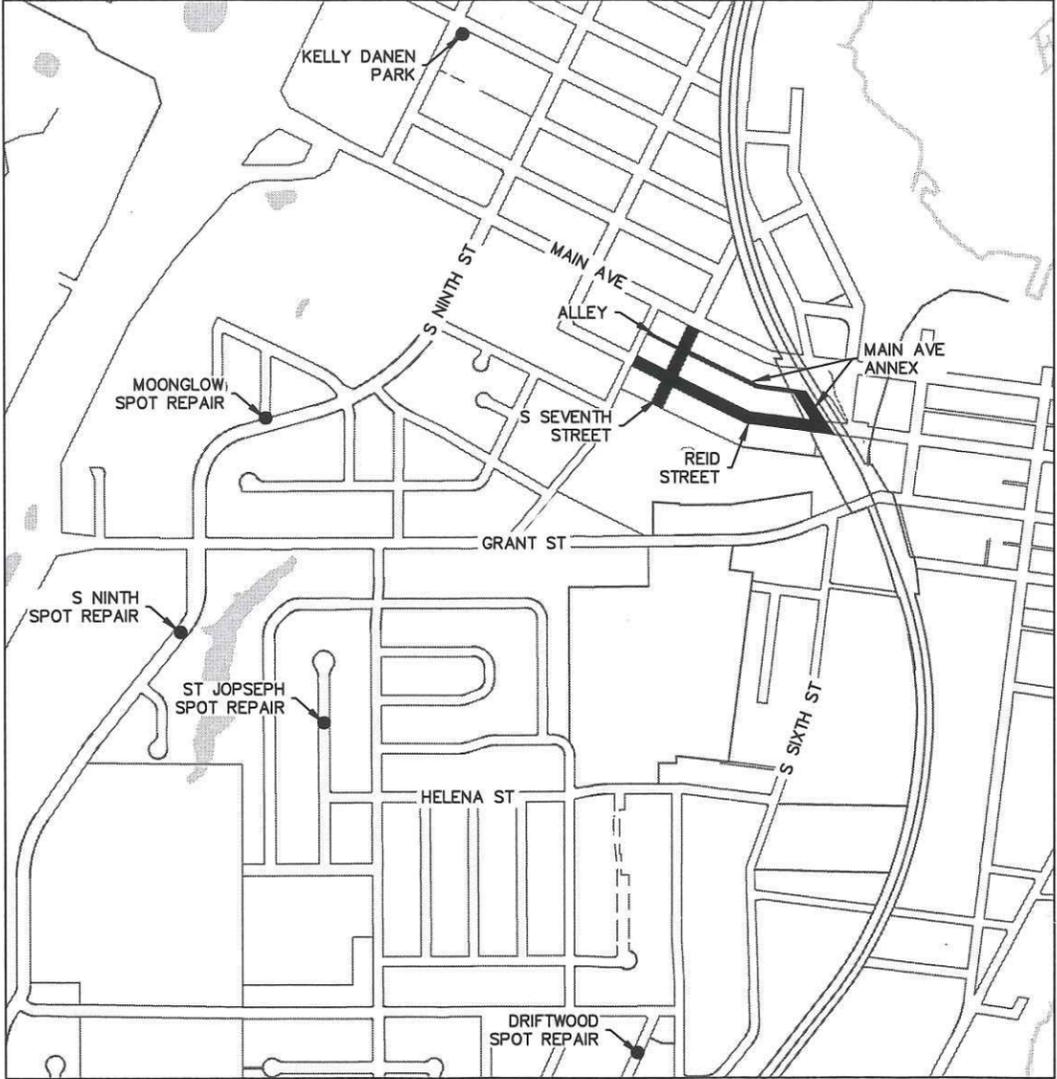

\* As outlined in the NRCS Field Book for Describing and Sampling Soils, Version 2.0 (2002).

### GENERAL CONSTRUCTION NOTES:

1. ALL ELEVATIONS ARE REFERENCED TO NAVD 88.
2. THE WORK UNDER THIS CONTRACT SHALL BE IN ACCORDANCE WITH THE CITY OF DE PERE, CURRENT CONSTRUCTION SPECIFICATIONS AND THESE SPECIAL PROVISIONS AND PLANS, AND THE LATEST ADDITION OF THE WISCONSIN DEPARTMENT OF TRANSPORTATION STANDARDS SPECIFICATIONS FOR HIGHWAY AND STRUCTURE CONSTRUCTION SPECIFICATIONS, LATEST EDITION, WHERE REFERENCED IN THE CITY SPECIFICATIONS.
3. ALL EROSION CONTROL MEASURES SHALL BE IN PLACE PRIOR TO CONSTRUCTION AND SHALL CONFIRM TO THE WISCONSIN DEPARTMENT OF NATURAL RESOURCES CONSTRUCTION SITE EROSION CONTROL AND TECHNICAL STANDARDS.
4. EXISTING UTILITIES SHOWN ON THE PLANS ARE APPROXIMATE. THE CONTRACTOR SHALL BE RESPONSIBLE FOR OBTAINING EXACT LOCATIONS AND ELEVATIONS OF ALL UTILITIES. WHETHER SHOWN OR NOT, FROM THE OWNERS OF THE RESPECTIVE UTILITIES. ALL UTILITIES OWNERS SHALL BE NOTIFIED BY THE CONTRACTOR 72 HOURS PRIOR TO EXCAVATION.

- TYPE 3 BARRICADES**
- Orange diagonals shall slope down toward the traffic side.
  - Signs mounted on Type III barricades should not cover more than half of the top two rails or 33 percent of the total area of the three rails.
  - Type A Flashing Warning Lights may be used - place on both side of barricade. Required for nighttime work or if device remaining overnight.

- NOTES:**
- The approach sight distance to the flagger shall be at least the Decision Sight Distance (D).
  - If the flagger's ability to see oncoming motorists beyond the work space is less than the Decision Sight Distance (D), two flaggers shall be used.
  - If the work space must be left unattended at night use Layout 12.
  - The two-way taper should be 50 feet in length and using 5 equally spaced channelizing devices.
  - END ROAD WORK sign should be placed 500 feet past work area.

LANE CLOSURE, ONE FLAGGER, TWO-LANE, TWO-WAY ROADS  
12 HOURS or LESS LAYOUT 14

**SDD 15C05 Traffic Control, Advance Warning Signs 40 MPH or Less Two Way Undivided Road Open to Traffic**

**GENERAL NOTES**

THE EXACT NUMBER, LOCATION, AND SPACING OF ALL SIGNS AND DEVICES SHALL BE ADJUSTED TO FIT FIELD CONDITIONS.

THE SPACING BETWEEN TRAFFIC CONTROL SIGNS SHOULD BE ADJUSTED TO NOT CONFLICT WITH AND SHOULD PROVIDE A MINIMUM OF 200 FEET (300 FEET DESIRABLE) CLEARANCE TO EXISTING SIGNS THAT WILL REMAIN IN PLACE.

ALL SIGNS ARE 48" X 48" UNLESS OTHERWISE NOTED. IF NECESSARY DUE TO SPACE CONSTRAINTS, 36" X 36" SIGNS MAY BE USED INSTEAD OF 48" X 48" SIGNS.

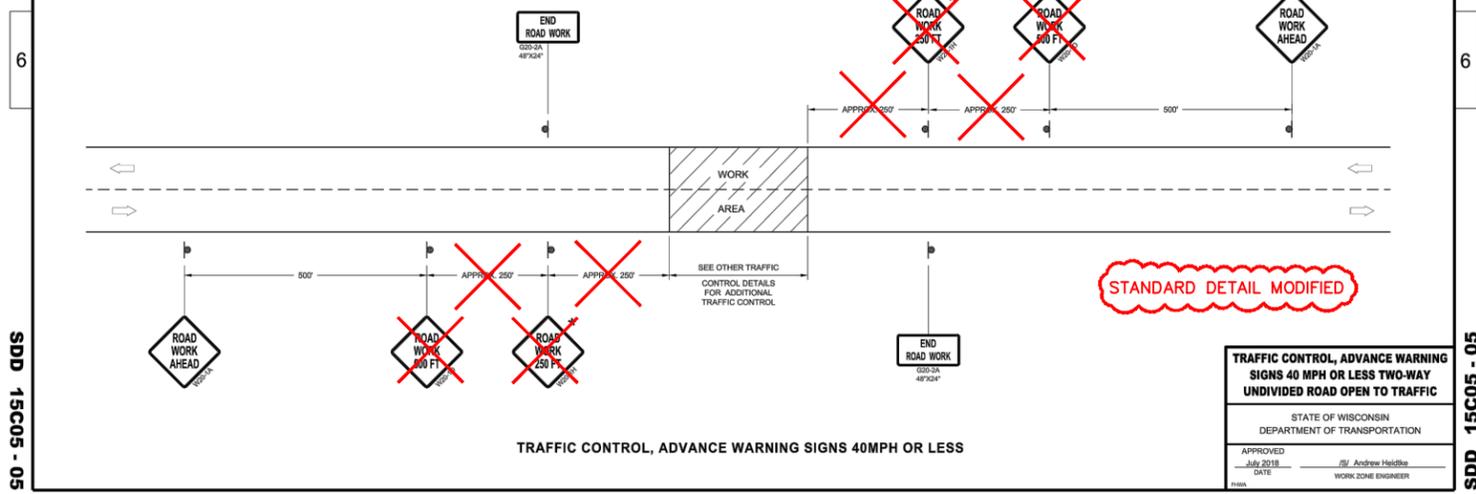

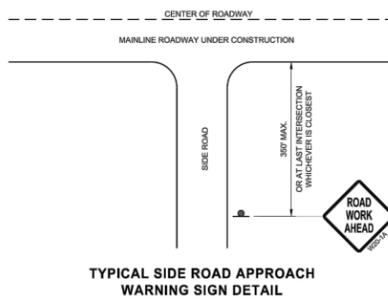

SIGNS THAT WILL BE IN PLACE LESS THAN SEVEN CONTINUOUS DAYS AND NIGHTS MAY BE MOUNTED ON PORTABLE SUPPORTS.

IF A "STOP" SIGN MUST BE REMOVED FOR A WORK OPERATION, A TEMPORARY "STOP" SIGN SHALL BE PLACED PRIOR TO THE SIGN REMOVAL, OR A FLAGGER SHALL BE PROVIDED UNTIL THE SIGN IS REESTABLISHED.

\* THE THIRD W20-1 SIGN IS REQUIRED ONLY IF THERE IS AN INTERSECTION BETWEEN THE "ROAD WORK 500 FEET" SIGN AND THE WORK ZONE. ADJUST THE PLACEMENT OF THIS SIGN BASED ON INTERSECTION LOCATION AND OTHER FIELD CONDITIONS.

**LEGEND**

- Sign on permanent support
- Direction of traffic
- Work area
