SUBJECT: Approve grant application to WDNR for Voyageur Dock repairs.

The Wisconsin Department of Natural Resources has a grant program through the Waterways Commission that allows us to apply for funding to assist in refurbishing docks and/or boat launches. We would like to leverage our $5000 that has been approved in the 2014 budget to try and get additional funding for repairing our docks at Voyageur Park. We are hopeful that with the grant we can refurbish all the Finger Points. Prior to submitting for the grant we need approval from the Park Board and City Council.

Staff Recommendation: Approve grant application and forward to City Council.

SUBJECT: Approval of funding to install web cameras at Riverwalk and Wildlife Viewing Pier.

Staff has generated a proposal to consider funding webcams on the Riverwalk and Wildlife Viewing Pier. See attached summary and information.

Staff Recommendation: Install two webcams for the Riverwalk at a cost of approximately $3,000.

Riverwalk Security/Web Camera Summary

As part of the Riverwalk Project, we have been investigating options for placing security and/or web cameras on site to help with safety as well as marketing of the facility. At this time, I do not believe placing “security” type of cameras will be financially responsible.

Summary:
Staff met with several companies to research the ability to install “security” type of cameras on site at the Riverwalk. During the consultations with companies, it was apparent because internet was not available or fiber available on site, it would cause some difficulties in creating a cost effective security system. Estimates ranged from $30,000 to $80,000 to install cameras for security purposes. On top of this cost, the City would also need to include how to get internet service on site which could cost an additional $5,000-$20,000.

Staff then researched options with assistance from St. Norbert Information Technology and Security staffs. Similar information was provided, in that it would be difficult to develop a cost effective security system because of the situation. St. Norbert staff felt that web cams at different locations could provide a cost effective start.

Staff met with the City’s IT Director to investigate costs of implementing web cams, versus camera’s for security purposes. It is recommended by the IT Director, considering the variables, that we pursue wireless web cameras. A drawback with wireless web cameras, is that you must pay for a monthly service to maintain the camera. However, a positive to this option is that we do not have to consider or deal with the problem of running fiber/internet service on site. The cost to do a wireless web camera is approximately $500 with a $50/month service charge.

When considering the best option to pursue, I have included/listed some variables to consider;
- Placing any permanent structure on the physical island will require us to obtain permission from the Navigation Authority as well as the State Historical Preservation Office. This could be a very time consuming process.
- Placing something on the Viewing Pier or Fishing Dock would not require permission.
- There currently is no internet connection available on site. Our options include running fiber in ourselves, contract a company for internet service to include running infrastructure to the island, or go wireless.
- Web cameras and Security cameras are able to be manipulated via zoom and panning by staff.
- Funding of this project would be through the current De Pere Riverwalk and Wildlife Viewing Pier project.

I have summarized the various options below.

<table>
<thead>
<tr>
<th>Option</th>
<th>Equipment/Installation</th>
<th>Monthly/Yearly Cost</th>
<th>Benefits/Drawbacks</th>
</tr>
</thead>
</table>
| City Hosted Security Camera System    | $35,000 - $100,000     | Normal annual maintenance if fiber is installed by City Monthly internet | Benefits:  
  - Would have recorded security video  
  - Could also incorporate web cameras |
<table>
<thead>
<tr>
<th>Wireless Security Camera</th>
<th>Service if fiber is not installed by City.</th>
<th>Drawbacks:</th>

<td>$50/month per camera (estimate)</td>
<td>- Cost</td>
</tr>
<tr>
<td></td>
<td></td>
<td>- Obstacles in installation</td>
</tr>
</tbody>
</table>

**Benefits:**
- Would have recorded security video

**Drawbacks:**
- Monthly cost per camera
- Susceptible to connection problems via wireless service.
- Distance would prevent cameras from getting quality images that would be beneficial in security issues.

<table>
<thead>
<tr>
<th>Wireless Web Camera</th>
<th>$500/camera (does not include installation)</th>
<th>$50/month per camera (estimate)</th>
<th>Benefits:</th>
</tr>
</thead>
<tbody>
<tr>
<td></td>
<td></td>
<td></td>
<td>- Cost (would not be a large investment in starting out)</td>
</tr>
</tbody>
</table>

**Drawbacks:**
- Would not have saved video for security purposes.
- Susceptible to connection problems via wireless connection.

Staff Recommendation:
Purchase two wireless "web cameras" and year-long subscription at a cost of $3000. The first camera would be proposed to be placed on Light Pole 3 of the Claude Allouez Bridge as a wide panning shot of the entire facility. (See included photo from Light Pole 3) The second camera would be placed on the light pole at the end of the viewing pier. I believe this gives us the luxury of zooming in various elements of the facility (ie. Fishing dock, shoreline, Eagle's ledge, etc...) It is likely this would not give a good close up of fish activity by the spillway (walleye and sturgeon), but would show a few tails of sturgeon and people viewing. A second option would be to place underneath the viewing pier's first section, facing the area where all the fish come to spawn. This would provide a better "close up" of the fish, however would not be as versatile in viewing other areas.
